COLLEGE OF THE HUMANITIES

HUMS4103 (Fall Term) 2011 Some hints on what to expect!

Objective: to make you sufficiently literate regarding some of the significant scientific issues of the day so that you will be able to read the newspapers over the next few years with a critical eye. Also, I want to draw some connections between science and disciplines that you are more familiar with, namely, music and art.

I have invited four guest lecturers to assist me with lectures designed to explain to you the scientific background of their various areas of expertise in terms that a layperson can comprehend.

I can be reached at david_gardner@carleton.ca

The lectures are on Thursdays in Paterson Room 303 at 6.00 - 9.00pm. Lectures begin on Thursday **September 15th, 2011**. The tentative sequence at press time is:

	,	
1.	Science & Art – a shared creative	vity? Prof. David Gardner (College)
2.	Big Bang	Prof. David Gardner (College)
3.	Alchemy to Bohr	Prof. David Gardner (College)
4.	The Fossil Record	Prof. Claudia Schröder-Adams (Earth Sciences)
5.	Evolution	Prof. David Gardner (College)
6.	Cell Biology & Genetics	Prof. David Gardner (College)
7.	"You are what you eat!"	Prof. Gerald Buchanan (Chemistry)
8.	Molecular Biology	Dr. John Nash (Genomics Researcher)
9.	Plagues (Black Death, HIV etc)	Prof. David Gardner (College)
10.	Sex, Drugs & Rock'n'Roll	Prof. David Gardner (College)
11.	Global Warming	Dr. John Stone (Environment Canada)
12.	Pollution	Prof. David Gardner (College)

Examinations will be:

1. Mid-term Book Review

Imagine you are the junior culture journalist for a national newspaper. In the grand journalistic tradition, given that you hold a Humanities degree, your editor assigns you a book review column for the weekly science page! Your job is to read the assigned books and explain to your readers what they are about and why they should, or should not, bother to read them. **Due on Thursday October 20th at the beginning of the lecture.**

From the list below of popular science titles, please select one by Lecture 3 and review it.

Author	Title		Publisher		ISBN		Library
Alder, K.	The Measure of All Things		Free Press	2002	0-7432-167	5-X	
Braun, S. Buzz	z: The Science & Lore of Alco	hol and Caffeine	OUP 1996	•	0-19-50928	89-9	
Boorstein, D.	The Discoverers		Random 1	983	0-394-4022	29-4	yes
Bronowski, J	The Ascent of Man	BBC 19'	73	0-563-10	498-8	yes

Watson, J.	DNA The Secret of Life	Knopf 2003	0-375-41546-7	
Wolpert & Richards Passionate Minds – the inner world of scientists OUP 1997 0 19 854904 0			yes	

Some clues about the books:

Alder: Describes the seven year effort to correctly calculate the size of the metre (which was

begun during the French Revolution and contains a hidden error!)

Braun: a very readable account on how alcohol and caffeine affect human physiology Boorstein: the former Librarian of the Smithsonian in expansive mood – a history of how we

humans got from there to here.

Bronowski: this book was the companion to the BBCTV series in the early 1970s. Bronowski

presents a superbly imaginative series of articles on the nature of human achievement.

Chandrasekhar: I confess this is one of my most favourite books. Chandra is as erudite and searching on

Shakespeare and Beethoven as he is on Newton.

Clark: a readable and fascinating account of how cells work – how they begin and end.

Crawford: A lucid exposition on viruses – and mankind's interactions with them.

Dawkins: books that made quite a stir when they were published – including his latest.

Diamond: a fascinating mix of science, anthropology and sociology.

Gleick: A succinct, clear account of the life of one of the great genius' of Western thought (warts

and all)

Gould: a writer who can make the obscure not only intelligible but leave you wanting more. Hall: This book "breathes scintillating life into the most momentous science of our day,

assesses the political and bioethical controversies it has spawned..."

Jolly: another good read, as she elaborates her ideas on the origins of human intelligence.

Hawking: Brief History: one of the most successful attempts to explain the erudite ideas of current processes. Ditto Plack Holes and The Universe in a Notabell. Now we have his lettert.

cosmology. Ditto *Black Holes* and *The Universe in a Nutshell*. Now we have his latest: *The Grand Design*. Hawkins recently retired from Newton's old chair as Lucasian Professor of Mathematics at Cambridge and is in the advance stages of Lou Gehrig's

disease. An exceptional achievement on all fronts.

Highfield: a superbly imaginative and informative book – though he concedes that broomsticks may

never fly! A must for J.K.Rowling fans.

Kandel: A most engaging book. A surprising achievement given that this is part autobiography of

a Nobel laureate and part lucid account of how he has transformed our understanding of

the brain and of the mind.

Kauffman: For those of you who want a real challenge – this is the one. Kauffman argues against

reductionism (fashionable since Newton) as a method of explaining the Universe and everything else! The book covers everything – science, philosophy, economics, history,

ethics, poetry, religion ... and is worth the effort.

Lane: I found it a fascinating read. It is very literate: "The story that unfolds is more dramatic,

more compelling, more intricate than any creation myth."

Livio: This is a most engaging traversal of the history of mathematics and how it has informed

our understanding of the Universe.

Maddox: formerly editor of *Nature* for a quarter-of-a-century, Maddox writes a fascinating book

on where the Twenty-first Century might go scientifically.

Marks: "Mark's book is a novel, intellectually provocative, and wittily engaging treatment of a

topic now a shibboleth of modern genetics."

Mayr: A summing up of a long career of biological enquiry. Here the holistic approach wins the

day!

Medina: Even the preface is funny! And Dante's *Purgatorio* from *The Divine Comedy* is front and

centre as an organizing device for the entire book!!

Rees: A fascinating analysis of why things are the way they are – and a discussion of the

concept of multiverses.

Sample: Sample is an award-winning science writer for The Guardian. This is your best bet for

understanding why the search for the Higgs Boson (The God Particle) is so important - it is the only missing piece of the Standard Model of particle physics - which is why everyone is impatiently awaiting the first results from the Large Hadron Collider at

CERN.

Singh: A history of how we have arrived at the BIG BANG theory of the creation of the

Universe. Astonishingly, this is a 'page turner'.

Watson: A classic. You can smell the adrenaline as Watson and Crick race to beat Linus Pauling

in unravelling the structure of DNA.

Watson: Watson in full flood in a "classic telling of the defining scientific saga of our age." Wolpert & Richards: A book that reveals scientists as passionate human beings – often equally entranced

by the arts as by their science. Some have become expert practitioners in both disciples.

2. **Final Term Paper** (suggest: 10 –15 pages, double spaced)

For the final assignment of the course you are to select a scientific issue that is of concern/interest to you. Note that science is neither aspects of engineering nor social psychology. Make sure you have my agreement on your topic of choice before submission of your essay. This will avoid any confusion about putative topics that may be on the borderline of science. I am expecting you to read several (not just one or two) sources for your basic material (which should be revealed in the References section at the end of your essay) and to draw a synthesis and criticism of what you have read. To assist you in your choice the College is subscribing to the weekly *New Scientist* which contains layperson-readable articles on 'hot' scientific issues of the day. (For example, global warming, genetically-modified foods, pollution, particle physics, etc). These copies will be kept on the library shelves in Room 302. Please read them only in the College rooms and return them to the shelves when you have finished reading them. Other sources of inspiration may be found on the internet – though reader beware! Not all internet sites operate with good scholarly premises. It is wise also to find corroborative articles elsewhere.

The heart of your essay should explain the basic science (as we currently understand it) behind the topic under review with an explanation as to why it is an issue that merits concern and/or interest. **Due on Thursday December 1st at the beginning of the last lecture.**

The final mark for HUMS4103 will consist of:

Fall term Mid-term Book Review 50% of final grade Fall term Final Term Paper 50% of final grade

Prof. David Gardner, Professor emeritus, former Dean of Science

REGULATIONS COMMON TO ALL HUMANITIES COURSES

COPIES OF WRITTEN WORK SUBMITTED

Always retain for yourself a copy of all essays, term papers, written assignments or take-home tests submitted in your courses.

PLAGIARISM

The University Senate defines plagiarism as "presenting, whether intentional or not, the ideas, expression of ideas or work of others as one's own." This can include:

- reproducing or paraphrasing portions of someone else's published or unpublished material, regardless of the source, and presenting these as one's own without proper citation or reference to the original source;
- submitting a take-home examination, essay, laboratory report or other assignment written, in whole or in part, by someone else;
- using ideas or direct, verbatim quotations, or paraphrased material, concepts, or ideas without appropriate acknowledgment in any academic assignment;
- using another's data or research findings;
- failing to acknowledge sources through the use of proper citations when using another's works and/or failing to use quotation marks;
- handing in "substantially the same piece of work for academic credit more than once without prior written permission of the course instructor in which the submission occurs."

Plagiarism is a serious offence which cannot be resolved directly with the course's instructor. The Associate Deans of the Faculty conduct a rigorous investigation, including an interview with the student, when an instructor suspects a piece of work has been plagiarized. Penalties are not trivial. They can include a final grade of "F" for the course

GRADING SYSTEM

Letter grades assigned in this course will have the following percentage equivalents:

A+ = 90-100 (12)	B = 73-76 (8)	C - = 60-62(4)
A = 85-89 (11)	B- = 70-72(7)	D+ = 57-59(3)
A = 80-84 (10)	C+ = 67-69(6)	D = 53-56(2)
B + = 77 - 79 (9)	C = 63-66(5)	D - = 50-52(1)

Failure. Assigned 0.0 grade points

ABS Absent from final examination, equivalent to F
DEF Official deferral (see "Petitions to Defer")

FND Failure with no deferred exam allowed -- assigned only when the student has failed the course on the basis of inadequate term work as specified in the course outline.

Standing in a course is determined by the course instructor subject to the approval of the Faculty Dean.

WITHDRAWAL WITHOUT ACADEMIC PENALTY

The last date to withdraw from FALL TERM courses is DEC. 5, 2011. The last day to withdraw from FALL/WINTER (Full Term) and WINTER term courses is APRIL 5, 2012.

REQUESTS FOR ACADEMIC ACCOMMODATION

You may need special arrangements to meet your academic obligations during the term because of disability, pregnancy or religious obligations. Please review the course outline promptly and write to me with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. You can visit the Equity Services website to view the policies and to obtain more detailed information on academic accommodation at: carleton.ca/equity/accommodation/

Students with disabilities requiring academic accommodations in this course must register with the Paul Menton Centre for Students with Disabilities (PMC) for a formal evaluation of disability-related needs. Documented disabilities could include but not limited to mobility/physical impairments, specific Learning Disabilities (LD), psychiatric/psychological disabilities, sensory disabilities, Attention Deficit Hyperactivity Disorder (ADHD), and chronic medical conditions. Registered PMC students are required to contact the PMC, 613-520-6608, every term to ensure that your Instructor receives your Letter of Accommodation, no later than two weeks before the first assignment is due or the first in-class test/midterm requiring accommodations. If you only require accommodations for your formally scheduled exam(s) in this course, please submit your request for accommodations to PMC by Nov.11, 2011for the Fall term and March 7, 2012 for the Winter term. For more details visit the Equity Services website: carleton.ca/equity/accommodation/

PETITIONS TO DEFER

If you miss a final examination and/or fail to submit a **FINAL** assignment by the due date because of circumstances beyond your control, you may apply a deferral of examination/assignment. If you are applying for a deferral due to illness you will be required to see a physician in order to confirm illness and obtain a medical certificate dated no later than one working day after the examination or assignment deadline. This supporting documentation must specify the date of onset of the illness, the degree of incapacitation, and the expected date of recovery.

If you are applying for a deferral for reasons other than personal illness, please <u>contact</u> the Registrar's Office directly for information on other forms of documentation that we accept.

Deferrals of assignments must be supported by confirmation of the assignment due date, for example a copy of the course outline specifying the due date and any documented extensions from the course instructor.

Deferral applications for examination or assignments must be submitted within **5 working days** of the original final exam.
