This document has been created as a part of the High School Outreach Program at the Centre for European Studies (CES). Each class in the Ontario Secondary Curriculum in which European Studies could be effectively incorporated has been included in this list. Specifically, for each of these classes, particular units and sub-units have been identified that can be thematically related to the European Union and international issues more broadly.

All EU lesson plans, topics, independent study topics and interactive activities that have already been created by CES have been included in the description to their related classes. CES has developed and continues to expand its comprehensive set of lesson plans to reflect the teaching goals of different classes in the Ontario secondary curriculum.

The units and their subsequent subunits listed below can be tied into European Union through discussion about its formation, present economic union, political unification aims or in context of the current issues that affect the supranational organization.
