Several short films from the European Union highlight various environmental issues facing the planet, our food, health, and ecology.

AP 132, Carleton University, 1:30-5:00 pm

1:30-2:10–**Estonia: Desertification**. Desertification is a serious issue in sub-Saharan Africa where the desert is advancing several kilometers per year.

2:10-3:30–**Sweden: The Planet**. The Planet is about much more than climate change – it is about the Earth as a whole.

3:30-3:40–**Romania: Save the Living Danube**

3:40-5:00–**Finland: Recipes for Disaster**. A shocking tale of environmental impact and a heartfelt look at family and relationships against the backdrop of modern suburbia.

The screenings are organized by the Centre for European Studies at Carleton University in cooperation with the Department of Geography and Environmental Studies at Carleton University and the Embassy of the Czech Republic in Ottawa. This event is supported in part by a grant from the European Commission.
