

# 2015 Walker Summer Research Award

**Undergraduate students are invited to apply for a 2015 Walker Summer Research Award.**

The Walker Summer Research Award was established by Dr. Graham Walker, a 1970 BSc Honours in Chemistry graduate from Carleton University who is currently a professor of Biology at MIT.

The purpose of the award is to assist promising undergraduate students gain research experience with a research group in Chemistry or Biochemistry at Carleton during the summer.

Interested undergraduate students should submit an application by February 27, 2015 to the Walker Award committee:

Walker Award committee  
c/o Ann Anderson  
203 Steacie Building

The application must include the following:

1. A cover letter outlining your research experience, your aspirations for a career in research, and a brief description of your intended summer research project. One or two pages is sufficient for this letter.
2. A written affirmation of interest from your intended faculty supervisor to support you for the summer.
3. Your contact information.

If you require more information, please email
