Tuesday, Nov. 12th, 5:30pm - 7:30pm

Carleton University Campus
Room 720A, Loeb Building

"Tracking The German Leap": For more than a decade, Germany has been engaged in the most ambitious sustainability shift of any major industrial nation - a transition to renewable energy & hyper-efficiency, known in German as the Energiewende ("Energy Transition"). In "Tracking The German Leap", , Chris Turner explores Germany's pursuit of a low-carbon future - their leap in mid-flight - illustrates the model's successes & setbacks, and outlines key lessons & opportunities for Ontario in our own energy transition.

CHRIS TURNER is an author, speaker & strategist, providing Canada's most authoritative voice on sustainability & the global clean-tech boom. His book *The Leap* (Globe and Mail: "one of the most arresting arguments for building a green economy yet in print") & the 2007 bestselling *The Geography of Hope* have been hailed as sustainability blueprints for government, business, & communities across Canada & worldwide. Turner is founder & lead of the Calgary-based strategic sustainability consulting firm, LeapWorks.
