COURSE DESCRIPTION

"As we learn about each other, so we learn about ourselves."
- Dr. Who

"You will be Absorbed. Your individuality will merge into the unity of Good. And in your submergence into the common being of the Body, you will find contentment and fulfillment. You will experience the Absolute Good."
- Landru

"Human beings never think for themselves, they find it too uncomfortable. For the most part, members of our species simply repeat what they are told – and become upset if they are exposed to any different view. We are stubborn, self-destructive conformists. Any other view of our species is just a self-congratulatory delusion."
- Michael Crichton, *The Lost World*

Are we self-destructive conformists? Has our natural curiosity about the world and about ourselves been beaten down through a systematic, mind-numbing, technologically-driven (educational) paradigm? Or should we just resign ourselves to the “Force” or the “will of Landru” and give up our personal responsibility entirely?

This genre-specific course will focus on the roots, development, and allegory of science fiction literature, and then we'll apply these to contemporary issues. We will explore the relationship between scientific concepts and the arts, and progress through to our (sometimes) uneasy relationship with technology. As we consider our psychological attraction to speculative fiction, we will examine a number of issues in contemporary culture, specifically: our fascination with the "god complex", the juxtaposition of hope and danger in the possibility of other worlds, postmodernism, our contemporary, social media-driven culture, politics and power, and ultimately what it means to be human.

Speculative (or science) fiction gives us special insight into making sense of the world in our everyday lives. Science fiction can uncover the ways ideology, narrative, and epistemology function on a day-to-day basis. As a result, we will be taking science fiction literature seriously and will consequently be dealing with a number of "human" issues that concern us in our contemporary culture.

This course will be taught through a combination of media-driven lectures, dialogic journaling, and class discussions in a format that provides you with an opportunity to work specifically with primary materials, introduces you to relevant collections and archives, and facilitates the development of critical thinking skills. To that end, you will be expected to prepare fully for each class by reading the required texts, preparing discussion questions, and participating (dialogically) in the discussions.

Please note... this course has a heavy reading load along with weekly journaling assignments.

Some of the questions informing the structure of this course include:

- How did (and how does) the rise in science and technology impact on romanticism and faith?
- How does the role of science in society subsequently inform the evolution of human identity?
- In what ways does a logical, "scientific" approach to understanding our world allow us to critically evaluate the nature of human beings?
- Can science, and by extension science fiction, solve our social problems?
- How do we reconcile ourselves to the monster within?

Since many of the course requirements are initiated, refined, or completed in class, full attendance and participation are expected.

PRIMARY READINGS

Please note: I expect you to have the texts entirely read on the first day we discuss them. The emphasis in this course is on the discussion of ideas, and in order to do that effectively, you must have actively read the texts.

ASSIGNMENTS

There are weekly assignments for your dialogic journal – a journal in which you will write your thoughts, questions, and comments about texts we are reading along with specific questions that I will be asking. Your journals are to be handed in electronically each week... yes, I said each week... and this work is worth 40% of your final mark in the course.

In addition to the weekly journal, there is one term assignment where you will have an option between writing an academic essay or doing something creative.

ATTENDANCE / PARTICIPATION

You are expected to attend every class and to actively participate in the discussions. Participation includes: bringing the text to class, having read the assigned pages, and contributing to the discussion either by offering ideas or comments, or by listening attentively.

FINAL EXAMINATION

There is a final examination for this course. It will comprise two sections: multiple choice and an essay. The material on the exam will be drawn from the lecture material, readings, and class discussions. **You will be allowed to bring your dialogic journal to the final exam.**

METHOD OF EVALUATION

Assignment	Description	Length	Value	Due Date
Dialogic Journal	A weekly journal comprising your thoughts, responses, comments etc about the texts or class material that we encounter	Varies	40%	To be handed in electronically each week
Random Quizzes	12 quizzes, given weekly and on-line. Your best 10 results only will be counted.	12 quizzes on line	10%	weekly
Mid-term	Mid-term multiple choice test.	In class	15%	Oct 11
Term Assignment	Option (A) Essay – an original analysis and argument of some aspect of an assigned text. OR Option (B) Creative Project - (story, series of poems, play, short film, creative nonfiction, full lecture, and so forth) revealing substantial understanding of the science fiction genre.	(A) 1500 words (B) varies	15%	Nov 22
Final Exam*	Covers all material from the course. In two parts: (1) Multiple choice; (2) Essay. You will be allowed to bring your dialogic journal with you to the exam.	3 hrs.	20%	

Further instructions regarding the dialogic journal, quizzes and term assignment will be provided in class.

***The final exam and airplane ticket bookings:** The mid-term exam period is from December 11 – 22, 2013. Since the Registrar's Office does not set exam dates until well into the term, you must plan to be available throughout the entire examination periods. Do not purchase plane tickets or plan vacations with departure dates prior to the end of each exam period. Exams will not be rescheduled for students who take on other commitments during the exam period.

COURSE PROCEDURES, GRADES, AND GRADING

Basic Preparation: As a matter of course you are expected to: (1) attend all lectures, (2) complete the scheduled readings beforehand, (3) arrive prepared to discuss what you have read, (4) bring the relevant text(s) to class and (5) bring your journals with you, either to add notes as we go along or to use to contribute to the conversation.

Handing In Assignments: Weekly dialogic journals are to be handed in electronically to me via CULearn each week. Dates and times to be discussed in class. Any journal that is not submitted by the due date/time will be considered late. It is the students' responsibility to become familiar with any dates/regulations which may take precedence over any course outline.

Recognizing that life happens, you will automatically have **one “pass” week** where you do not have to submit your journal but you do have to let me know by the due date/time if you are taking your “pass”.

Late Assignments / Extensions: Do not ask for extensions without a medical certificate. If your work is handed in late, so be it. As such, you already have an automatic extension with consequences. For the *weekly journal*, I will note the lateness and this will factor in to your mark for this part of the course. For each day that your *term assignment* is late, I will automatically deduct 2% .

Confirming Receipt of Assignment: Upon receipt of your journal / assignment, I will enter “received” in the CULearn gradebook for this class, confirming that I have it. It is your responsibility to check the gradebook the following afternoon to make sure your work has been received.

Grading Criteria: Grades for term work will be based on insightfulness, originality, focus, organization of ideas, clarity of expression, scholarly rigor, correct use of MLA style, spelling, and grammar.

Grade Scale:

Letter	%	GPA
A+	90-100	12
A	85-89	11
A-	80-84	10
B+	77-79	9
B	73-76	8
B-	70-72	7
C+	67-69	6
C	63-66	5
C-	60-62	4
D+	57-59	3
D	53-56	2
D-	50-52	1
F	0-49	0

Plagiarism:

The University Senate defines **plagiarism** as **presenting, whether intentionally or not, the ideas, expression of ideas, or the work of others as one's own.**

This can include:

- reproducing or paraphrasing portions of someone else's published or unpublished material, regardless of the source, and presenting these as one's own without proper citation or reference to the original source
- submitting a take-home examination, essay, laboratory report or other assignment written, in whole or in part, by someone else
- using ideas, quotations, or paraphrased material, concepts or ideas without appropriate acknowledgement in an essay or assignment
- failing to acknowledge sources through the use of proper citations when using another's works, and/or failing to use quotation marks
- handing in substantially the same piece of work for academic credit more than once without prior written permission of the course instructor in which the submission occurs

Plagiarism is a form of intellectual theft. It is a serious offence that cannot be resolved directly with the course's instructor. The Associate Deans of the Faculty conduct a rigorous investigation, including an interview with the student, when an instructor suspects a piece of work has been plagiarized. Penalties are not trivial. They can include failure of the assignment, failure of the entire course, suspension from a program, suspension from the university, or even expulsion from the university. See the Section on Academic Integrity in the Student Conduct Portion of the Undergraduate Calendar.

ACCOMMODATION

Pregnancy obligation: write to me with any requests for academic accommodation during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist. For more details visit the Equity Services website
