

NPSIA Works: Career Futures

NPSIA AROUND THE WORLD

Description of the Field

As we were updating the profiles for this revision of Career Futures, we noticed that the job titles and advertisements for positions were almost all based in Canada.

This 'profile' focuses on jobs outside North America, and shows only a small sample of the countries in which NPSIA alumni are working. A wide variety of job titles, including those located in NGOs, international organizations, Canadian foreign service and CIDA, are featured.

While most graduates of NPSIA apply their policy knowledge within the Canadian federal government, a multitude of opportunities are available outside North America, which we have attempted to reflect in this section.
