Course Description

One of the aims of pragmatics is to explain the distinction between sentence meaning and speaker's meaning. In this respect the study of how context influences and guides the interpretation of utterances is extremely important. Of extreme importance is also the cognitive capacity we have to grasp others intended messages. Consider:

- (1) Jane got married and she got pregnant
- (2) Jane got pregnant and she got married

(1) and (2) are of the form "p & q". In logic "p & q" is thought to be equivalent with "q & p". Thus if (1) is true (2) must be true as well. Yet, (1) and (2) convey different information, i.e. that there is a temporal order between Jane getting married and Jane getting pregnant: while (1) suggests that Jane got married and *then* she got pregnant, (2) suggests that Jane got pregnant and *then* she got married. It is the business of pragmatics to explain how (1) and (2) can differ in the meaning they convey. It is also the business of pragmatics to explain how some relevant information can be implicitly transmitted.

Topics to be discussed include: speaker meaning, literal/non-literal meaning, pragmatic competence, conversational cooperation and interpretation, pragmatic and conventional implicatures, relevance, presuppositions, the pragmatics/semantics distinction, implicit *vs*. explicit, etc.

Aims and Objectives

The module aims to provide a general introduction to the development of some key notions pertaining to the philosophy of language. To do so we shall focus on some influential works of Grice, Sperber & Wilson, and others and the way they have been perceived by the philosophical and linguistic community.

Learning Outcomes

By the end of the module you should be able to:

- Understand notions such as: speaker meaning, literal/non-literal meaning, pragmatic competence, conversational cooperation and interpretation, pragmatic and conventional implicatures, relevance, presuppositions, the pragmatics/semantics distinction, implicit *vs.* explicit, etc. (see *Module Content* and *Topics to be Discussed*, for detailed information on the notions/topics we'll discuss).
- **Communication skills**: through essays writing and the feedback you will get on them you will further develop the capacity to present problems and propose solutions to them in a clear, precise and concise way. Through discussions you will also have the opportunity to develop the capacity to speak briefly and clearly on a given

subject/problem, to ask questions and requests for clarification, and to contribute constructively to discussion.

• You will have lot of opportunities to **interact** with other students in discussing some of the issues we will be dealing with.
