COURSE DESCRIPTION

Environmental issues have come to occupy a central place in policy, and society at large. Owing largely to the many environmental consequences that have accompanied industrialization, we humans have been forced to rethink our relationship with technology and nature. What is nature, and what role do humans occupy in it? What role should we occupy? What, if anything, do we owe non-human organisms? What do we owe future generations? How do we balance technological benefits against their environmental harms? What philosophical tools are useful in answering these questions? How should

answers to these questions factor in public policy? These are some of the central questions we will investigate in this course.

COURSE LEARNING OBJECTIVES

Upon successful completion of this course, students will be able to:

1. Compare and contrast philosophical theories and concepts of environmental ethics.
2. Apply theories and concepts of environmental ethics to prepare a basic policy position piece.
3. Compare policy options in order to formulate policy recommendations.
4. Justify particular ethical positions using clear argumentation.
5. Analyze the social implications of particular technologies using the methods, theories and concepts introduced in the course.

COURSE TEXT

Required Text (Available at the campus bookstore): Robbins, P., Hintz, J., Moore, S.A. (2014). *Environment and Society: A Critical Introduction (2nd ed.)*. (Malden, MA: Wiley Blackwell).

Other Readings: Other readings, videos, and news sources may be assigned throughout the course. Please keep current on CULearn for any additions to the course readings.

PEDAGOGY

As much as possible, I will be planning classes using a “flipped class” approach in which students support each other in learning activities. This means that I will minimize traditional lecturing in favour of peer learning. However, it is my expectation that you arrive to class having read the required readings and attend all classes. Material that is introduced in class (but not in the text) will be fair game on all exams/assignments. You should arrange to get notes from a friend/colleague if you are unable to attend class in person. In order to help you get through the course material outside of class I have minimized readings as much as is possible. My hope is that you come away from this course with an appreciation for the topics, and a genuine interest in pursuing further studies in philosophy.

STUDENT EVALUATION

Policy Brief: (40% of overall course grade) Students will be required to submit one written policy brief. Details will be distributed in class.
