

3RD ANNUAL INSTITUTE OF AFRICAN STUDIES

# UNDERGRADUATE RESEARCH CONFERENCE

**Theme: Migration and Human Right in Africa and the Diaspora**

This year's conference seeks to encourage interdisciplinary engagement with a new generation of continental and diasporic Africans confronting questions such as: How are global and intra-continental migration patterns impacting the continent and its diasporas? How have the rise of New Nationalisms and a global politics of fear shaped the migrant experience? What does the securitization and militarization of the border mean for fabricated national boundaries on the continent? In a time of increasing consequences of climate change, terrorist regimes, and refugees flow, how do we realize a vision of mobility as a human right?
