### **Course Description:**

This course is one of the introductory courses in African Studies. The primary focus of the course is to introduce students to the political, social and economic developments of pre and postcolonial Africa. The course will be divided into seven sections. The major themes explored during the first section of the course include discussions on the African environment in global perspective and how Africa relates to human origins. The second section explores Africa's spectacular achievements during the Ancient and Medieval periods. Section three examines slavery, colonization, struggle for political independence and colonial legacies. Section four will provide an analysis of the role colonial and neo-colonial legacies and the problems that Africans and their governments had to face in the early decades after independence. We will have an overview of how the conflicts, civil wars and political violence in Africa are caused by the combination of poverty and weak states, institutions and the prospects of democratic governance. Section five delves into some social dimensions of Africa since independence. This section will focus on understanding ethnicity, apartheid, genocide and gender relations. Section six explores Africa's development dilemmas. We shall examine popular movements toward democratization, the impact of globalization and how much of Africa's recent history had been conditioned by the Structural Adjustment Programs and how the focus has now shifted in favor to Partnerships and Poverty Reduction Strategy Papers. Finally, in section seven an in-depth examination will be made on the following critical problems and issues facing independent Africa: the prospect for democratization in Africa at the beginning of the new millennium, postapartheid South Africa, developments of radical Islam and the security challenges like those from Daesh (ISIL), Boko Haram and al-Shabab are not for few countries only, but a shared challenge. Then we will also investigate the old and the New (Sudan, Algeria, and Libya) Arab Spring. We will conclude an examination of the following issues: Africa's place in global affairs, economic development, political instability, and the challenges in the 21st century. We will investigate also the current crises in Ethiopia, Niger and Sudan and the new challenges facing their countries.

#### **Learning Objectives:**

- 1. Have a critical and broad understanding of contemporary Africa and the socio-historical forces that have shaped its present reality.
- 2. Be able to analyze and critically assess ideas, arguments, and viewpoints.
- 3. To continue to develop strong writing and analytical skills.

Course Format: Over the course, a broad range of topics will be examined through class discussion, which will be predicated on students having read the assigned materials for the week. Lectures will provide overviews of broader themes and periods. Course readings will provide detailed and texture to the themes and periods covered in the lecture, and discussion will give you the opportunity to ask questions about aspects of the readings and lectures that either confuse or inspire your interest. We will also draw on films and documents whenever appropriate to present images of Africa, the environment, people and cultures.

#### **Tutorial Sections**

The TA's will lead sections weekly to discuss the readings\lectures and will assist in clarifying important concepts and help you to develop critical analysis of the materials. You are required to attend and participate in the lecture and the tutorial sessions.
