

A BEVY OF BUTTERFLIES

PAT MCGRATH, THE OTTAWA CITIZEN

Ed Bruggink is the greenhouse supervisor at Carleton University's Nesbitt Science Building, which opens a butterfly exhibition Saturday. Several hundred exotic butterflies, including several new species, will be free to fly in the greenhouses from 9 to 4 p.m. every day until Oct. 11. He is showing off an atlas moth, one of the largest moths in the world. It does not eat during the adult stage and has no mouth parts.
