

GRADUATE STUDENT OPPORTUNITIES!

ARE YOU INTERESTED IN COMMUNITY BASED CONTAMINANTS RESEARCH ?

Trent University's Environmental Forensics Lab is seeking students for a project focussed on empowering communities to become active participants in a cross-country snapshot of polyfluoroalkyl substances (PFAS) contamination in fish.

Students with an interest in environmental chemistry, toxicology, and/or participatory action research should get in touch!

Contact us today to learn more about this exciting GRADUATE STUDENT opportunity. MSc and PhD positions available.
