

HLTH 4601 / 5703

Environmental Pollution & Health, Winter 2021

This course will examine Canadian and global problems relating to the health impacts of exposure to pollution and consider the scientific approaches to understanding and addressing these problems. Participants will develop a practical proposal for research or action on an environmental or occupational health issue.

Prerequisite(s): HLTH 3104 or permission of the department.
Lecture and seminar three hours a week.

Instructor: Philip Blagden
Schedule: Mondays 6:05pm – 8:55pm
