

1. Sign in to Brightspace and enter your Brightspace course as Instructor.
2. Select the **Pearson MyLab & Mastering** widget on your Brightspace course homepage. **Note**, if the widget is not already in your course, please add it, or contact your Brightspace Administrator to have this added to your Brightspace course.
3. Select the yellow **Get Started** button to begin the integration set-up.
4. If prompted, read and agree to the license agreement by selecting **I Agree**. Enter your existing Pearson instructor account, or create a new one, if prompted. Your Pearson account is now linked to your Brightspace account. This account linking is a one-time process. Select **Get Started**.
5. Choose to create a new course from the catalog, copy an existing course by entering a Course ID, or copy a previously created course in your account.
6. When your course preference appears, click on **Select**.
7. You will need to name your MyLab or Mastering course and select the course start and end dates. Choose **Student-use Course**, and set the Start date to the current date. The End date is the last time students will be able to access their work; we recommend setting it to after the last course examination. This can be changed retroactively.
8. Select **Create Course** to finish the set-up.
9. You're done! Your course is being created and will be ready to go shortly.
