

CLIMATE CHANGE AND RENEWABLE ENERGY POLICY IN THE EU AND CANADA

Join leading scholars and experts from across North America and Europe as they examine European and Canadian approaches to climate change and renewable energy policy in a changing global environment.

This international workshop and public forum will examine European and Canadian approaches to renewable energy production and climate change policy. Topics will include the sustainable energy transition, social acceptance and public attitudes toward environmental issues, the role of cities, and policy options for renewable energy development in Europe and Canada.

Thursday, October 1, 12:30 pm - 6:00 pm

Friday, October 2, 9:00 am - 5:30 pm

2220-2228 (Conference Rooms)

River Building, Carleton University
