Instructor: Burak Gunay, PhD, PEng
Virtual meeting room via Zoom: https://carleton-ca.zoom.us/j/91404714521
Office Hour: Email to make an appointment for a one-on-one meeting. I will keep the following timeslot available: Wednesday 12 pm to 1 pm.
Email: burak.gunay@carleton.ca

The class will meet on Wednesdays at 8:35 am via Zoom. Lectures will be recorded and posted on Brightspace. After the lecture, there will be time allocated to answer your questions.
If registered to an in-person tutorial session, you are recommended to attend them after January 31. However, attendance is not mandatory. Software tutorial and problem analysis session videos will be posted on Brightspace.
Teaching assistants will hold office hours on different timeslots.

Teaching Assistants
Email to make an appointment for a one-on-one meeting. Following timeslots will be kept available.
Darwish Darwazeh (Darwish.Darwazeh@carleton.ca) – Tuesday 11 am to 12 pm
Dre Markus (Andre.Markus@carleton.ca) – Wednesday 2 pm to 3 pm
Brodie Hobson (Brodie.Hobson@carleton.ca) – Thursday 11 am to 12 pm
Kayle Campbell (Kayle.Campbell@carleton.ca) – Thursday 2 pm to 3 pm
Pedram Nojedehi (Pedram.Nojedehi@carleton.ca) – Friday 9:30 am to 10:30 am

Learning Objectives:
- Analyze heat, air, and moisture transfer in buildings
- Understand engineering methods in building science
- Design for control of heat, air, and moisture in a severe climate

Reading (s)/Textbook (s):
- Lecture slides on Brightspace
- Lecture notes and tutorials

Software:
See instructions for remote access to computers with the required software. You can also install LBNL Therm and LBNL Window on your personal computer at the link provided.

- LBNL Therm
- LBNL Window
- WUFI

Additional reference books:
Course Plan:

Week of Jan 10 Background
- Definition and importance of building science
- A brief history of building science

Week of Jan 17 Weather and climate
- Climate data for building performance analysis
- Heating and cooling degree-day
- Solar geometry and radiation

Week of Jan 24 Heat transfer and storage in buildings - part 1
- Thermal transmittance
- Methods to compute thermal transmittance for wood-frame and steel-frame assemblies

Tutorial 0 Software Demo - accessing software
Tutorial 1 Software Demo - LBNL WINDOW and THERM

Week of Jan 31 Heat transfer and storage in buildings - part 2
- Boundary conditions (film coefficients, sol-air temperature, SHGC)
- Thermal mass

Week of Feb 7 Heat transfer and storage in buildings - part 3
- Thermal properties of envelope materials and windows
- Thermal analysis and design of walls, ceilings, attics, and roofs
- Measuring thermal properties

Tutorial 2 Problem analysis - heat transfer and weather & climate

Assignment 1 due Feb 16

Week of Feb 14 Properties of air
- Psychometric analysis
- Mixing, heating, cooling, dehumidifying and humidifying air

Tutorial 3 Midterm review (online only - pre-recorded tutorial)

Week of Feb 28 Midterm

Tutorial 4 Problem analysis - properties of air

Week of Mar 7 Infiltration
- Driving mechanisms
- Air pressure calculations
- Measuring air leakage
- Energy cost of infiltration
• Control of infiltration in buildings

Week of Mar 14 Ventilation
• Natural, mechanical, and mixed-mode ventilation
• Mechanical ventilation configurations
• Ventilation standards
• Heat recovery and economizers
• Psychrometric analysis of air handling units and variable air volume terminal zones

Tutorial 5 Problem analysis - infiltration and ventilation

Assignment 2 due Mar 23

Week of Mar 21 Vapour diffusion
• Vapour diffusion
• Analysis of condensation potential
• 1D steady-state vapour transfer in materials and assemblies
• Condensation & drying rates

Week of Mar 28 Vapour convection and condensation control
• Vapour convection
• Design strategies for condensation control

Tutorial 6 Problem analysis - Vapour transport
Tutorial 7 Software demo - WUFI

Week of Apr 4 Moisture and rain control
• Capillary action
• Moisture storage and deterioration mechanisms
• Strategies to mitigate moisture damage in cold climates
• Rain control

Week of Apr 11
Tutorial 8 Final review

Assignment 3 due April 8

Grade Distribution:
Midterm 20%
Assignment 1 (Heat) 10%
Assignment 2 (Air) 10%
Assignment 3 (Moisture) 10%
Final exam 50%

Letter Grade Distribution:
Academic Regulations, Accommodations, Plagiarism University rules regarding registration, withdrawal, appealing marks, and most anything else you might need to know can be found on the university’s website here.

Academic Accommodations for Students with Disabilities The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send me your Letter of Accommodation at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation (if applicable). Requests made within two weeks will be reviewed on a case-by-case basis. After requesting accommodation from PMC, meet with me to ensure accommodation arrangements are made. Please consult the PMC website (www.carleton.ca/pmc) for the deadline to request accommodations for the formally-scheduled exam (if applicable).

For Religious Obligations Students requesting academic accommodation on the basis of religious obligation should make a formal, written request to their instructors for alternate dates and/or means of satisfying academic requirements. Such requests should be made during the first two weeks of class, or as soon as possible after the need for accommodation is known to exist, but no later than two weeks before the compulsory event. Accommodation is to be worked out directly and on an individual basis between the student and the instructor(s) involved. Instructors will make accommodations in a way that avoids academic disadvantage to the student. Students or instructors who have questions or want to confirm accommodation eligibility of a religious event or practice may refer to the Equity Services website for a list of holy days and Carleton’s Academic Accommodation policies, or may contact an Equity Services Advisor in the Equity Services Department for assistance.

For Pregnancy Pregnant students requiring academic accommodations are encouraged to contact an Equity Advisor in Equity Services to complete a letter of accommodation. The student must then make an appointment to discuss her needs with the instructor at least two weeks prior to the first academic event in which it is anticipated the accommodation will be required.

Plagiarism Plagiarism is the passing off of someone else’s work as your own and is a serious academic offence. For the details of what constitutes plagiarism, the potential penalties and the procedures refer to the section on Instructional Offences in the Undergraduate Calendar.

What are the Penalties for Plagiarism? A student found to have plagiarized an assignment
may be subject to one of several penalties including: expulsion; suspension from all studies at Carleton; suspension from full-time studies; and/or a reprimand; a refusal of permission to continue or to register in a specific degree program; academic probation; award of an FNS, Fail, or an ABS.

**What are the Procedures?** All allegations of plagiarism are reported to the faculty of Dean of FASS and Management. Documentation is prepared by instructors and/or departmental chairs. The Dean writes to the student and the University Ombudsperson about the alleged plagiarism. The Dean reviews the allegation. If it is not resolved at this level then it is referred to a tribunal appointed by the Senate.

Plagiarism and cheating at the graduate level are viewed as being particularly serious and the sanctions imposed are accordingly severe. Students are expected to familiarize themselves with and follow the Carleton University Student Academic Integrity Policy (See [here](#)). The Policy is strictly enforced and is binding on all students. Plagiarism and cheating – presenting another’s ideas, arguments, words or images as your own, using unauthorized material, misrepresentation, fabricating or misrepresenting research data, unauthorized co-operation or collaboration or completing work for another student – weaken the quality of the graduate degree. Academic dishonesty in any form will not be tolerated. Students who infringe the Policy may be subject to one of several penalties including: expulsion; suspension from all studies at Carleton; suspension from full-time studies; a refusal of permission to continue or to register in a specific degree program; academic probation; or a grade of Failure in the course.

**Intellectual Property Statement** Student or professor materials created for this course (including presentations and posted notes, labs, case studies, assignments and exams) remain the intellectual property of the author(s). They are intended for personal use and may not be reproduced or redistributed without prior written consent of the author(s).
