

CIVE 4403/5200 – Masonry Design

	Instructor:	Ted Sherwood Office: Office Hours: I am easily reached b of them. Please use " the subject header wh prioritizing yours above	ted.sherwood@carleton.ca ME 3366 tbd y email. This means I get many CIVE 4403" or "CIVE 5200" in hen emailing as it aids me in ye others.
	TA:	Madeleine Fayle, mac	deleinefayle@cmail.carleton.ca
	Lectures: PA:	Every Wednesday Alternate Wednesdays (Sept 18, Oct 2, Oct 1	6, Nov 6, Nov 20, Dec 4)

No lectures or PAs during the week of Oct 21

Topics Covered:

1.Introduction-History of masonry and reinforced masonry -Structural design requirements, building loads, building layout2.Material Properties-Concrete and clay masonry units, mortar, grout, reinforcement -Properties of masonry assemblages3.Beams and Lintels-Singly and doubly-reinforced beams, deflections, shear, splices and development4.Columns-Design of masonry columns, pilasters -Slenderness effects, biaxial bending.5.Loadbearing Walls-Design of unreinforced walls and reinforced walls under axial load,

8. Design of Low-Rise -Bringing it all together: design of a low-rise industrial building	nging it all together: design of a low-rise indust	Design of Low-Rise	ndustrial building
Masonry Buildings		Masonry Buildings	

Note: topics may be added, modified or removed as the term progresses

Required Texts:

- Masonry Structures: Behaviour and Design (2nd Canadian Edition), R.G. Drysdale, B.R. Banting, Canada Masonry Design Centre, 769pp. This text has been generously donated by the Canada Masonry Design Centre (CMDC). Hard copies should be available soon.
- 2) CSA S304-14: Design of Masonry Structures, Canadian Standards Association, 126pp.

This text is available for free download from Carleton's Techstreet database. (https://library.carleton.ca/find/databases/techstreet-enterprise)

Mark Breakdown:

Assignments	30% (About 8 to 10 in total through the term)
Midterm Exam	20% (October 16, 2 hours long)
Final Exam	50% (3 hours long, time and date tbd)

The class will visit the masonry training centre at La Cité Collégiale in Orleans for a field trip (<u>https://carleton.ca/cee/2017/masonry-design-students-learn-hands/</u>) where students will learn masonry techniques and how to build a masonry wall. The trip will be held from 8:00-2:30 on a Wednesday when we have both a PA and lecture scheduled. A bus will be available to take students to and from campus, and more details will be presented in class. This excellent opportunity is being kindly supported by the masonry industry; hence attendance is mandatory (*failure to attend the field trip will result in a failing grade*). To accommodate inclusion of the field trip into the course, one or more lectures will be held during the PA sessions in addition to the regular lecture times.

Students are required to wear CSA approved steel-toed shoes on the field trip.

Assignments must be completed in pencil on engineering computation paper. Assignments must be neat, clear and of professional quality. Drawings are to be done by hand and in pencil. Assignments that are not handed in when due will immediately receive a 50% penalty. Thereafter a penalty of 10% per day will be assessed. The only reasons that will excuse a late assignment are illness documented by a doctor's note or prior permission from the instructor. Calculators (regular and programmable) are the only electronic aids permitted during exams. A minimum grade of 40 out of 100 must be obtained on the final exam in order to receive credit for the course.

General:

Attendance at lectures and PA sessions is mandatory. Handouts that supplement the lecture material will be given out from time-to-time during the term. Experience has shown that there is a direct relationship between regular attendance and the student's final grade (and can be the difference between a passing or failing mark).

Students are required to check Brightspace and their Carleton email regularly for messages, updates and course content. All electronic devices other than calculators are to be turned <u>off</u> prior to lectures.

The Paul Menton Centre for Students with Disabilities (PMC) provides services to students with Learning Disabilities (LD), psychiatric/mental health disabilities, Attention Deficit Hyperactivity Disorder (ADHD), Autism Spectrum Disorders (ASD), chronic medical conditions, and impairments in mobility, hearing, and vision. If you have a disability requiring academic accommodations in this course, please contact PMC at 613-520-6608 or pmc@carleton.ca for a formal evaluation. If you are already registered with the PMC, contact your PMC coordinator to send me your Letter of Accommodation at the beginning of the term, and no later than two weeks before the first in-class scheduled test or exam requiring accommodation. Requests made within two weeks will be reviewed on a case-by-case basis. After requesting accommodation from PMC, meet with me to ensure accommodation arrangements are made. Please consult the PMC website (www.carleton.ca/pmc) for the deadline to request accommodations for the formally scheduled exam.

Your professor would like to acknowledge that the land on which we gather for this course is the traditional and unceded territory of the Algonquin nation.
