Start Date Comments:	This position will start on September 27th, and complete on November 29th, 2019
Position Title:	Graduate Mentor
Number of Positions:	5
Salary:	\$800 Stipend at end of Competition
Location of Work:	Carleton University/Virtual
Job Description:	Job Description The Canadian Health Adaptation, Innovations & Mobilization (CHAIM) Centre is a Research Centre at Carleton University. The Centre is a hub for faculty members and researchers from various disciplines to share research results, collaborate and facilitate discussions among diverse populations (professional, students, and lay people alike) about the health of Canadians.

The CHAIM Centre is hosting the 2019 One HEALTH (Human, Environment, Animal Links to Health) Challenge this October. One health is an approach to understanding global health issues that takes into consideration multiple elements, and in particular human, animal, environmental factors, and their intersection with policy, economics, law, media, globalization and much more. The 2019 One Health Challenge is a six-week competition for undergraduate students from various disciplines to collaborate in teams to develop a framework and plan to tackle a current global health issue. Teams of five will present their strategy to a panel of judges who will select the winning team. Each of the winning group team members will have the opportunity to work with a faculty member or in a research lab that is studying an issue related to health.

This year, students will develop a framework for **a plan for the Ottawa inner city area to create the environment and social conditions that allow anyone, including marginalized or vulnerable populations, to be able to effectively care for, and derive the health benefits (psychologically, socially, emotionally and physically) of companion pets.**? Students must consider the scientific evidence, the social and environmental context, communications, and the policies, programs and infrastructure that are needed to promote healthy human-pet interactions in a dense urban area.

For more information, please see link for last year's challenge

Job Role:

Graduate Mentors for the 2019 One HEALTH Challenge are expected to guide a team of students throughout the competition. Mentors must prepare by reading the resources to help students, and be present at the opening (October 4th, 2019) and closing (November 22nd, 2019) sessions. They must attend their team's group meetings, act as a sounding board for ideas, a mediator when necessary, offer resources to students and communicate any questions students have for the organizing committee of the competition, whether logistic or otherwise. Mentors are to ensure students are progressing and motivated throughout the six weeks and are well prepared for presentation day. However, it is highly important that mentors are only there to provide student support, allowing the undergraduate students to complete the deliverables themselves.

Mandatory Requirements:

- Must be a currently enrolled Carleton University graduate student
- Must be available to attend Seminar - October 4th, 2019. 11:00am - 4:00pm
- Must be available to attend Presentation Day - November 22nd, 2019. 11:00am - 4:00pm
- Attend group meeting
- Motivate students
- Mediate conversations when necessary
- Encourage multiple perspective to a global health issue, pointing students in relevant directions and potential researchers who might advise them
- Communicate between student team and organizers of challenge
- Help students find resources to support strategic plan
- Ensure students progress in a timely manner throughout competition
- Other duties the may arise in support and relation to the challenge.
