

2024 Walker Summer Research Award

Department of Chemistry | Institute of Biochemistry

Undergraduate students are invited to apply for a 2024 Walker Summer Research Award.

Interested undergraduate students should submit an application to the Walker Award committee:

Walker Award Committee

c/o Nishtha Nagar

chemistry@carleton.ca

Application due date: February 29, 2024

The application must include the following:

1. A cover letter outlining your research experience, your aspirations for a career in research, and a brief description of your intended summer research project. One or two pages is sufficient for this letter.
2. A written affirmation of interest from your intended faculty supervisor to support you for the summer.
3. Your contact information.

If you require more information, please email chemistry@carleton.ca.

Please note that this award could move online if public health concerns continue.

The Walker Summer Research Award was established by Dr. Graham Walker, a 1970 BSc Honours in Chemistry graduate from Carleton University, who is currently a professor in the Department of Biology at MIT.

The purpose of the award is to assist promising undergraduate students in gaining research experience with a research group in Chemistry or Biochemistry at Carleton during the summer months.
