

INTRODUCTION TO FOOD SCIENCE - Winter 2026

FOOD 1001A

Department of Chemistry

--- COURSE OUTLINE ---

Instructor: Tyler Avis (he/him/his)
Department of Chemistry and Institute of Biochemistry
Carleton University
How to address me: Tyler

Lectures: **In-person lectures.** Tuesdays and Thursdays, 10:05 to 11:25 pm. Please check Carleton Central for the room location.

Contact: **Student hours (a.k.a. office hours):**

No set student hours
By appointment (in-person or virtual)

Office: 207G Steacie Building
Phone: 613-520-2600 x3121
Email: tyler.avis@carleton.ca

I can be reached by **email** at almost any time. When possible, I will reply promptly, usually the same day or the next morning.

Land Acknowledgement

At Carleton University, it is important that we acknowledge that the land on which we gather is the traditional and unceded territory of the Algonquin nation.

WELCOME TO THE COURSE

Course Description

FOOD 1001 [0.5 credit] – Introduction to Food Science
Overview of the food industry. Production, processing, product development, packaging, chemistry, analysis, microbiology. Elements risk assessment, policy making and regulation.
Lectures three hours a week.

Topics may include (in approximate order):

Week of	Lecture	
January 5	T	Course Introduction
	R	Food Science and Industry Food Categories and Composition
January 12	T	Food Categories and Composition Food Chemistry I – Carbohydrates, Lipids, Proteins
	R	Food Chemistry I – Carbohydrates, Lipids, Proteins
January 19	T	Food Chemistry I – Carbohydrates, Lipids, Proteins
	R	Food Chemistry II – Color, Flavor, Texture
January 26	T	Food Chemistry II – Color, Flavor, Texture
	R	Food Processing – Basic Principles
February 2	T	Review Lecture
	R	Test (February 5)
February 9	T	Food Processing – Basic Principles
	R	Food Processing – Animal Products
February 16	T	Winter Break – No Class
	R	Winter Break – No Class
February 23	T	Food Processing – Plant Products
	T	Food Microbiology – Food Spoilage and Fermentation
March 2	T	Food Microbiology – Food Spoilage and Fermentation
	R	Food Safety – Biological Contamination (Food Illness)
March 9	T	Review Lecture
	R	Midterm Examination (March 12)
March 16	T	Food Safety – Biological Contamination (Food Illness)
	R	Food Toxicology – Chemicals and Toxins

March 23	T	Food Engineering
	R	Sensory Evaluation and Product Development
March 30	T	Food Additives, Regulations, and Laws
	R	Food Biotechnology
April 6	T	Review Lecture

Important dates and deadlines can be found here:

<https://students.carleton.ca/academic-dates/>, including class suspension for fall, winter breaks, and statutory holidays.

Withdrawal date:

Please note that the academic withdrawal date this **Winter is March 15, 2026**. Consult the Calendar website for the most updated information: <https://calendar.carleton.ca/academicyear>

Learning Outcomes

Through this course, students will learn to:

1. Describe the composition of food and explain its biological, chemical, and physical relationships to food quality and safety
2. Explain principles, practices, and recent advancements in food production, processing, and preservation
3. Analyze theoretical concepts presented in lectures by applying analytical and creative thinking skills in analysis of food related issues, problems, and situations
4. Solve cases involving the processing and preservation of food products by applying chemical, biological, and engineering principles

Inclusive teaching:

I am committed to fostering an environment for learning that is inclusive for everyone regardless of gender identity, gender expression, sex, sexual orientation, race, ethnicity, ability, age, class, etc. All students in the class, the instructor, and any guests should be treated with respect during all interactions.

Community Guidelines:

The following values are fundamental to academic integrity and are adapted from the International Center for Academic Integrity*. In our course, we will seek to behave with these values in mind:

	As students, we will...	As a teaching team, we will...
Honesty	<ul style="list-style-type: none"> Honestly demonstrate our knowledge and abilities on assignments and exams Communicate openly without using deception, including citing appropriate sources 	<ul style="list-style-type: none"> Give you honest feedback on your demonstration of knowledge and abilities on assignments and exams Communicate openly and honestly about the expectations and standards of the course through the syllabus, and with respect to assignments and exams
Responsibility	<ul style="list-style-type: none"> Complete assignments on time and in full preparation for class Show up to class on time, and be mentally/physically present Participate fully and contribute to team learning and activities 	<ul style="list-style-type: none"> Give you timely feedback on your assignments and exams Show up to class on time, and be mentally & physically present Create relevant assessments and class activities
Respect	<ul style="list-style-type: none"> Speak openly with one another, while respecting diverse viewpoints and perspectives Provide sufficient space for others to voice their ideas 	<ul style="list-style-type: none"> Respect your perspectives even while we challenge you to think more deeply and critically Help facilitate respectful exchange of ideas
Fairness	<ul style="list-style-type: none"> Contribute fully and equally to collaborative work, so that we are not freeloading off of others Not seek unfair advantage over fellow students in the course 	<ul style="list-style-type: none"> Create fair assignments and exams, and grade them in a fair, and timely manner Treat all students equitably
Trust	<ul style="list-style-type: none"> Not engage in personal affairs while on class time Be open and transparent about what we are doing in class Not distribute course materials to others without authorization 	<ul style="list-style-type: none"> Be available to all students when we say we will be Follow through on our promises Not modify the expectations or standards without communicating with everyone in the course
Courage	<ul style="list-style-type: none"> Say or do something when we see actions that undermine any of the above values Accept a lower or failing grade or other consequences of upholding and protecting the above values 	<ul style="list-style-type: none"> Say or do something when we see actions that undermine any of the above values Accept the consequences (e.g., lower teaching evaluations) of upholding and protecting the above values

*This class statement of values is adapted from Tricia Bertram Gallant, Ph.D.

Learning Materials and Other Course/Lab-Related Resources

Mandatory texts and/or handouts: Students are not required to purchase textbooks or other learning materials for this course

Mandatory required materials: a computer and an internet connection

Evaluation/Grade Breakdown:

Test	20%	(February 5, 2025)
Midterm Exam	40%	(March 12, 2025)
Final Exam	40%	Scheduled by Exam Services in the Final Exam period

There will be **no changes** (reweighting or any other modification) to this evaluation scheme.

Test and Midterm Examination:

The test and midterm examination will be written in-person during a regularly scheduled class. No notes, textbooks or other material are allowed. All students are **required to write all tests and exams**. The test and midterm examination will be 1 hour 20 minutes. The test and midterm will consist of true/false, multiple choice, short answer, and problem-solving/case study questions.

As all tests/exams need to be written, **accommodations** (if approved by the instructor) for short-term and long-term missed work (i.e., in the event that a student misses a scheduled test or examination) take the form of a **deferred test/exam**. A deferred test/exam is only possible under certain conditions as outlined below.

Missed Test or Midterm Examination

The instructor will apply the **same policies** on exemptions for illness, family emergencies, etc. and academic misconduct to the test and midterm examination as the University applies to formally scheduled final examinations and take-home examinations, as indicated in the Undergraduate Calendar at the following link:

<https://calendar.carleton.ca/undergrad/regulations/academicregulationsoftheuniversity/examinations/>

Specifically concerning the exemptions, the instructor will apply the policies outlined in Section 4.3 of the aforementioned Undergraduate Calendar to the test and midterm examination as follows:

1. A request for a **deferral** must be made in writing (e.g., by email) to the instructor no later than three working days after date of the exam; and

2. A request for deferral must be fully supported by appropriate documentation, which must include **completion of the following online form** <https://carleton.ca/registrar/academic-consideration-coursework-form/>.

Final Examination:

The Final Examination will be written in-person in the final exam period. Date, time, and location of the final exam will be determined at a later date by the University. No notes, textbooks or other material allowed. All students are required to write the final exam. The final examination will be 1 hour 30 minutes. The final exam will resemble the test and midterm and will therefore consist of true/false, multiple choice, short answer, and problem-solving/case study questions.

Lecture format:

Lectures will begin at 10:05 and, at this time, students are encouraged to ask questions stemming from the previous lecture. After the question period, the presentation of new material will begin and will continue until 11:25.

Lecture material will be presented as PowerPoint slides. The slides will be available on Brightspace. Students are expected to have the slides in class in order to help them take notes when appropriate.

Teaching and learning activities, including lectures, discussions, presentations, etc., by both students and instructors, are copy protected and remain the intellectual property of their respective author(s). All course materials, including PowerPoint presentations, outlines, videos, and other materials, are also protected by copyright and remain the intellectual property of their respective author(s).

Students registered in the course may take notes and make copies of course materials for their own educational use only. Students are **not permitted** to reproduce or distribute lecture notes and course materials publicly for commercial or non-commercial purposes without express written consent from the copyright holder(s).

Assignments (statement):

Exercises, problems, and case studies associated with all of the topics of the course are an **integral part** of this course. In this course, the instructor provides three instances in which these learning activities are performed by students. They occur the class immediately preceding the test and midterm exam and on the last day of class (i.e., before the final exam period). These are performed during regular class hours. It is the responsibility of the student to attend and participate in these assigned exercises as they will help prepare for the test and exams. They will not be handed in for grading. However, students are free (and encouraged) to ask questions about the exercises during these in class exercise periods.

Academic Accommodations and Regulations

Carleton is committed to providing academic accessibility for all individuals. You may need special arrangements to meet your academic obligations during the term. The accommodation request processes are outlined on the Academic Accommodations website (<https://students.carleton.ca/course-outline/>).

Statement on Generative AI usage (e.g., Chat GPT):

As the core evaluation items (e.g., test, midterm exam) happen in a classroom setting without authorized material, it is not permitted to use AI tools. However, if this situation should change, please note the following statement on AI use in this course:

Minimal Use – Basic Assistance Only

AI Use in this course: Students may use AI tools for basic word processing and formatting functions, including:

- Grammar and spell checking (e.g., Microsoft Word Editor)
- Basic formatting and design suggestions (e.g., Microsoft Word's formatting tools, PowerPoint Design editor)

Documenting AI Use: It is not necessary to document the use of AI for the permitted purposes listed above. If you have questions about a specific use of AI that is not listed above, please consult me.

Why have I adopted this policy? This policy ensures that student voices and ideas are prioritized and authentically represented, maintaining the integrity of the work produced by students while allowing basic support to enhance clarity, correctness, layout, and flow of ideas. The goal of adopting a limited use of AI is to help students develop foundational skills in writing and critical thinking by practicing substantive content creation without the support of AI.

Statement on Academic Integrity

Students are expected to uphold the values of academic integrity, which include fairness, honesty, trust, and responsibility. Examples of actions that compromise these values include but are not limited to plagiarism, accessing unauthorized sites for assignments or tests, unauthorized collaboration on assignments or exams, and using artificial intelligence tools such as ChatGPT, Grammarly, and Copilot when your assessment instructions say it is not permitted.

Misconduct in scholarly activity will not be tolerated and will result in consequences as outlined in [Carleton University's Academic Integrity Policy](#). A list of standard sanctions in the Faculty of Science can be found [here](#).

Additional details about this process can be found on [the Faculty of Science Academic Integrity website](#).

Students are expected to familiarize themselves with and abide by [Carleton University's Academic Integrity Policy](#).

Student Rights & Responsibilities

Students are expected to act responsibly and engage respectfully with other students and members of the Carleton and the broader community. See the [7 Rights and Responsibilities Policy](#) for details regarding the expectations of non-academic behaviour of students. Those who participate with another student in the commission of an infraction of this Policy will also be held liable for their actions.

Student Concerns

If a concern arises regarding this course, **your first point of contact is me:** Email and I will do my best to address your concern. If I am unable to address your concern, the next points of contact are the **Chair of the Department of Chemistry**, followed by the **Office of the Dean of Science**.

Note: You can also bring your concerns to [Ombuds services](#).
