

Monitoring Democratic and Governance Processes: An Evidence-Based Approach

Presentation to
Andean Governance Working Group
LIMA
2007

With the generous support of the Office for Democracy and
Governance - CIDA

From Countryrisk.com:

"Tired of playing second fiddle, Canada raises the bar with this site, which easily outshines the CIA's State Failure project (see separate entry). The base aim is similar: discover what factors correlate with violent political conflict, with a view to early warning and prevention.

"The CIFP, a joint academic-government project, tells us we should be looking out for. Factors include a history of conflict, environmental stresses, ethnic divisions, and militarization, among others. A well-done interface spits out the base statistics, and irregular risk reports provide country risk ratings as well as dry, detailed country risk assessments. Reports on hot topics such as corporate social responsibility also appear on the site."

<http://www.countryrisk.com/guide/archives/000156.html>

CIFP Goals

- To provide decision-support tools for desk officers;
- To provide strategic and operational guidance for policy makers;
- To integrate problem-centred analysis into whole-of-government policy-making; and
- To develop a network of research and policy capabilities across Canada.

Democratic Processes and Governance Project Goals

- Evidence-based analysis of governance and democratic processes in countries using CIFP methodology
- Contribute to a better understanding of governance and democratic processes in selected countries
- Provide decision-support to policy-makers in area of democratic processes and governance

Effective Development Policy

Effective policy in developing states requires a solid analytic base that:

- Identifies the relative risks that each state faces internally and poses externally;
- Combines real time dynamic analysis with structural information;
- Provides policy relevant diagnosis;
- Matches the analysis to the operational capacity of the end user; and
- Provides an evaluative framework for assessing policy impact.

- **Multi-source data**
 - Expert and field surveys and research
 - Event monitoring/dynamic data analysis
 - Structural comparative risk assessment
- **Intensive research oriented focus**
- **Comparative case-study structure**
- **Tailored to the policy needs of desk officers in all parts of the Canadian government/WB/OECD**

Beneficiaries

- Desk officers
- Members of the broader community of practice
 - Inter- and intradepartmental partners
 - Democracy Council
 - Other governance-focused NGOs
 - Academic community

Output and Sustainability

- **Country Reports, software website and template, database**
- **Manual based on methodology/concepts**

Methodology Project Inputs

Structural data

- Baseline assessment
- Relative ranking

Event-based data

- Field officer and expert surveys
- Allied, IO, NGO, private sector, and media reports

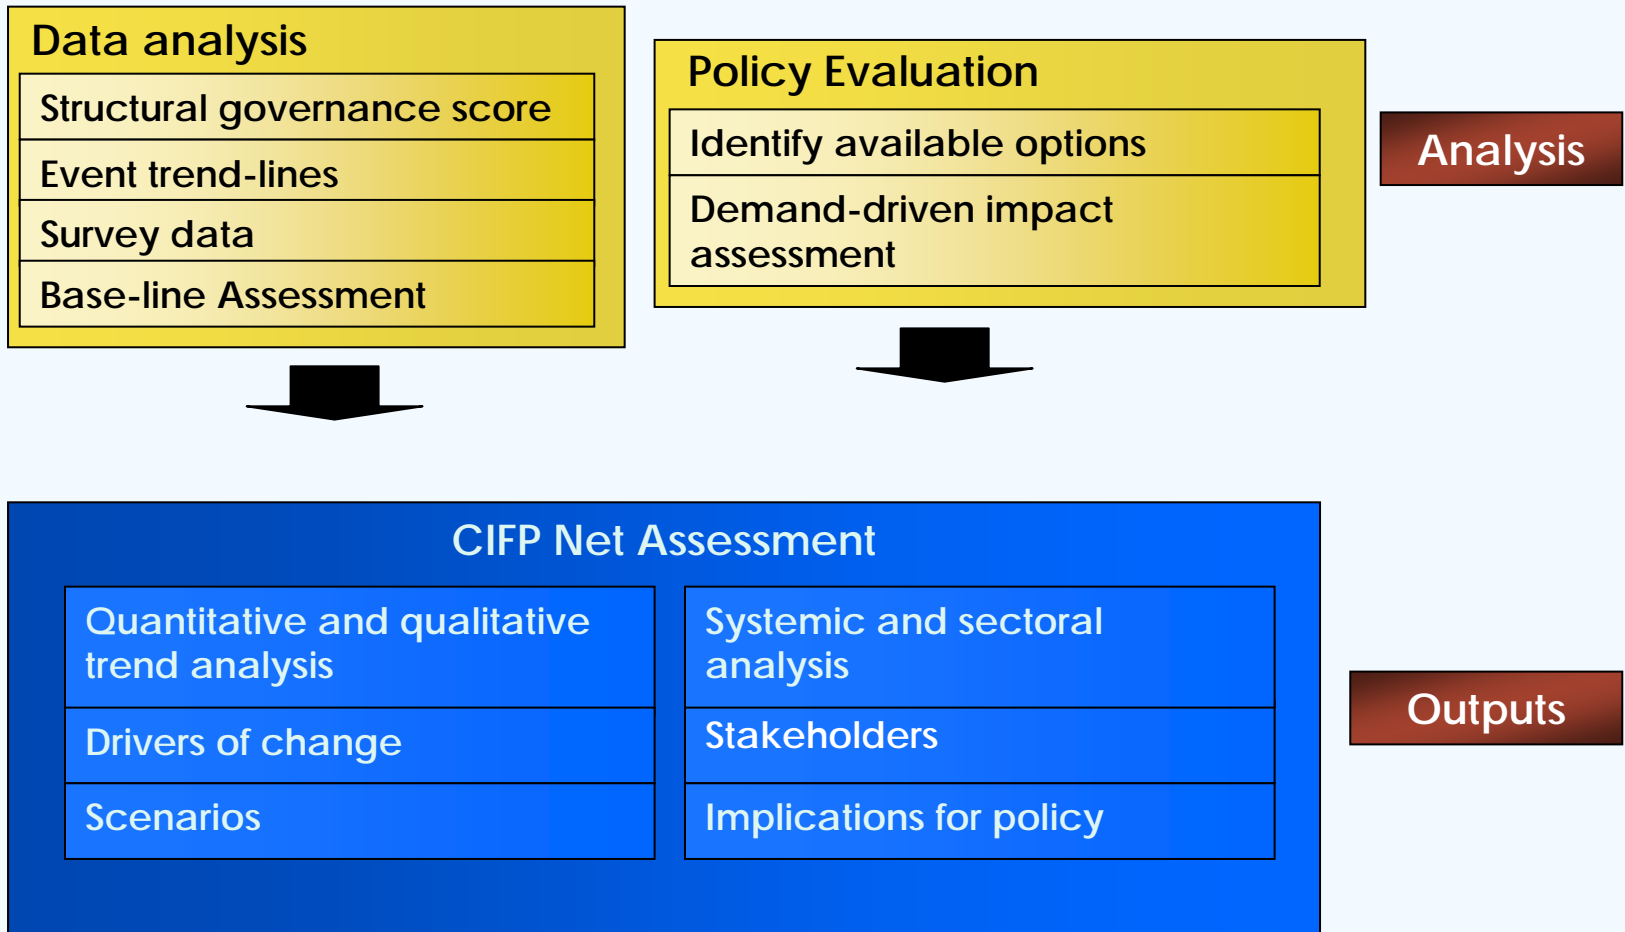

Evaluative Framework

Qualitative Assessment

- Survey data
- Expert opinion
- Structured analogy
- Iterative Delphi technique

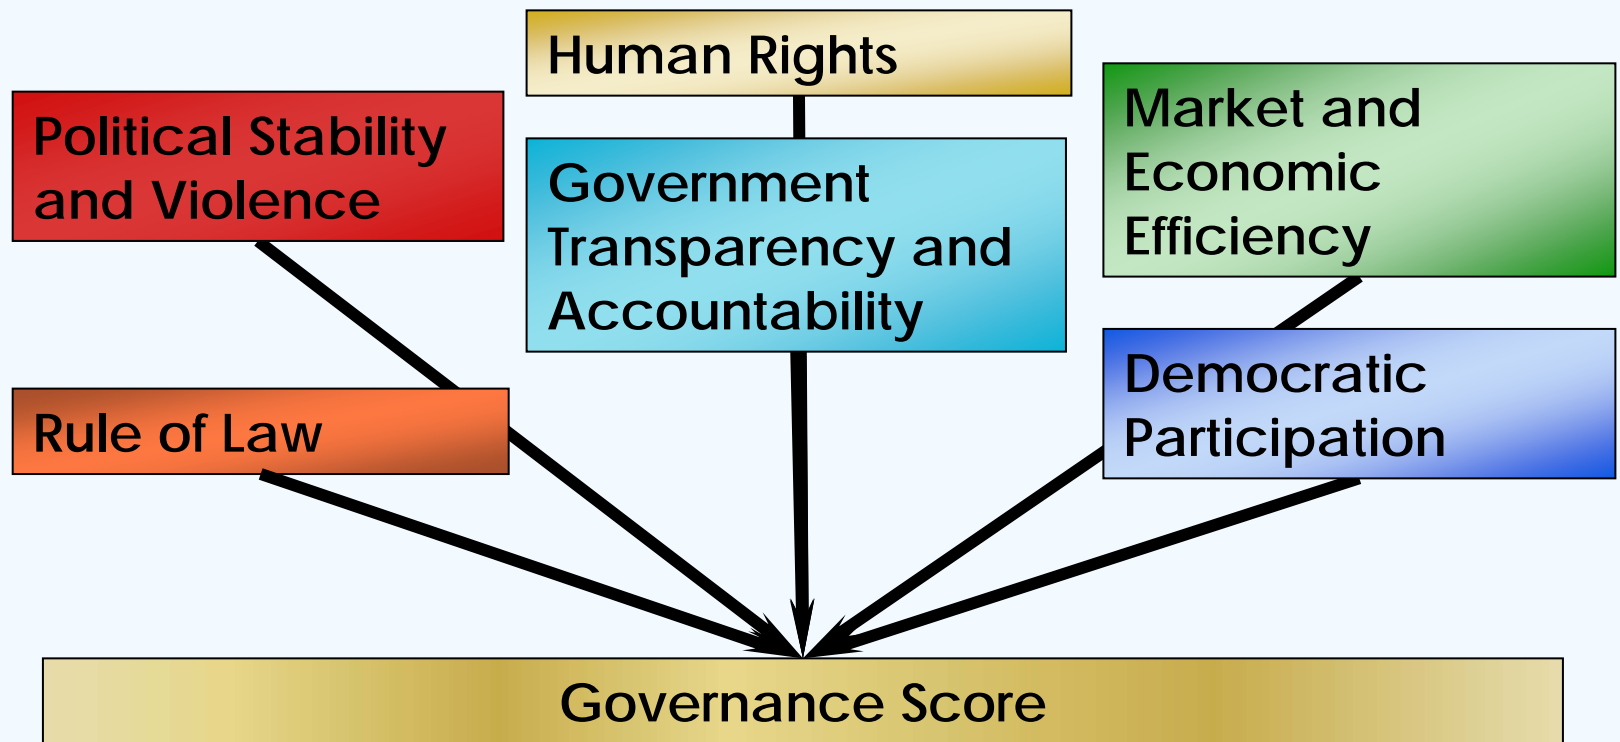

Methodology Analysis and Output

CIFP Structural Data Methodology

Indicator Clusters

For Governance CIFP creates an annual relative ranking of all countries based upon performance in six key indicator clusters; scores are calculated on the basis of over 100 indicators.

- Importance of multi-source data collection
- Need for demand-driven analysis
- Need to distinguish 'democratic process' from elections
- 'Boom-and-echo' effect of significant events
- Curvilinear nature of democratic development

	Costa Rica	El Salvador	Guatemala	Honduras	Nicaragua	Paraguay

CIFP Trend Analysis

Qualitative and Quantitative Inputs

In addition to a structural assessment for all countries, CIFP performs an event-based trend analysis for potentially fragile states. Data sources are varied, including both qualitative input from officers in the field and quantitative event monitoring.

TABLE 26 | AGGREGATE EVENT TREND—BASED ON DATA COLLECTED 01/07 TO 09/07

Expert Opinion Key Survey Topics

- Distribution of power
- Effectiveness of Institutions
- Effectiveness/professionalism of police, armed forces, judicial system, and prison system
- Presence of elected opposition
- Treatment/participation of potentially marginalized groups (e.g. urban and rural poor; ethnic, religious, cultural minorities; women)
- Government capacity
- Perceptions of government legitimacy
- Level of democratic participation
- Effectiveness/legitimacy of political parties (e.g. inclusiveness/polarization of major parties)
- Level and effects of corruption
- Effective regulation/management of the economy
- International development (level of international engagement, absorptive capacity, etc)
- Extent and effectiveness of pro-poor policies
- Respect for human rights
- Security from internal/external conflict
- Regional stability
- Key sources of instability in government and society
- Identification and assessment of recent trends
- Future forecasts
- Survey comments/feedback

cifp **HAITI**

1. Executive Summary

One of Haiti's key challenges is its police force's inability to establish security throughout the nation. Should the United Nations (UN) withdraw at any point in the near future, the current incapacity of the Haitian National Police (PNH) to assume its role as security provider will generate even greater instability. Haiti receives a great deal of international aid, but inefficiencies and corruption in the government impede its development progress.

TABLE 2

6.20	7.80	10.25
Human Rights	Government Transparency & Accountability	Democratic Participation
9.60	9.59	8.00

TABLE 3

Average Event Score	Trend
Moderately Positive 1.03	Status Quo 0.079

UNDERLYING CONDITIONS
An assessment of Haiti's structural baseline performance using the CIFP governance and democracy indexing methodology reveals that Haiti is still a high-risk nation that faces a number of key governance and democratization challenges (see Table 2). Poor performance in the Rule of Law, Human Rights, and Accountability and Transparency clusters remain the greatest concern.

EVENTS ANALYSIS
Daily monitoring of key events began with the inception of the governance project. 168 key events covering the range of political, economic and social interactions have been collected, weighted and assessed. The average event score is slightly positive at 1.03 indicating a slight but not significant improvement in Haiti's overall situation (see Table 3).

A large number of stabilizing events in the Government and Market Efficiency cluster, and destabilizing events in the Rule of Law and Political Stability and Violence clusters explain why the overall trend is only slightly positive. (See Table 4).

The CIFP project is intended to contribute to a better understanding of democratic processes and governance in Haiti, thereby providing support to decision-making for Canadian foreign policy and development actors. The project aims to support informed, evidence-based decision making for Canadian foreign policy and development assistance related to democratization and good governance. This report is the first in a series on governance and democracy in fragile states.

Haiti

Haiti faces four fundamental challenges on the path toward democracy and good governance (see Table 1). Security continues to be the major issue, with regular clashes between urban gangs, the Haitian National Police (PNH) and the United Nations Stabilization Mission in Haiti (MINUSTAH). Massive poverty and unemployment are responsible for the involvement of young Haitians in gang and criminal activity. Insecurity is a major obstacle to sustainable development and foreign investment.

TABLE 1: KEY FINDINGS

- Insecurity continues to impede development and investment
- Massive poverty and unemployment continue unabated
- An antiquated electoral system has proved complex and difficult to implement
- Parliamentary paralysis and corruption continue to impede social and economic reform

There is also a lack of confidence in the new democratic system. Elections were held on 7 February and 21 April 2006, but given the complexity of the electoral system, democratic processes will be difficult to sustain without the help of the United Nations. Préval and his deputies have yet to pass any legislation or implement any significant programs that will improve the quality of life for the majority of Haitians. Finally, problems with corruption and accountability remain.

* Signifies that there is only a single observation available for the indicator.

Relevant good governance and democratic processes indicators were divided in 6 clusters; Political Stability and Violence, Rule of Law, Human Rights, Government Accountability and Transparency, Government and Market Efficiency, and Democratic Participation. The data collected confirms that Haiti is still a country of concern, with much progress to make in terms of good governance and democratic processes. Five of the six clusters demonstrated a high risk for destabilization; the Rule of Law, Human Rights,

and Government Accountability and Transparency clusters were the lowest performers, but performance in Government and Market Efficiency and Democratic Participation are also cause for concern.

POLITICAL STABILITY AND VIOLENCE

As the only cluster at medium risk, its score of 6.20 can in part be explained by the absence of large-scale armed conflict and refugees produced; however, other indicators in this category score high, which accurately

portrays the situation on the ground. The score for permanence of regime type shows the fragility of the democratic system currently in place and takes into consideration the long tradition of authoritarian rule and military intervention in the political system. The score for politically motivated violence against civilians is also high, reflecting the political violence in the period prior to and following Aristide's departure. The score should decrease now as political stability is higher in the wake of Préval's election.

Stabilizing	27	5.00	56%
Destabilizing	27	-5.30	59%

TABLE 13

5.2 POLITICAL STABILITY & VIOLENCE

The slightly negative average score (-0.15) and continuation of the *status quo* (0.016) can in part be explained by the fading hopes that followed the first and second rounds of elections. As urban street gangs became more confident that the government would not be able to address the lack of rule of law in the short-term, the number of violent incidents between gangs, UN peacekeepers and police forces increased slightly. This followed an initial period of calm immediately after the Presidential and legislative elections.

The launch of the DDR campaign by MINUSTAH in cooperation with the government (and the agreement of some gangs to participate in it towards the end of the period monitored) and an improvement in relations between Haiti, its neighbours, and the United States help account for the slightly positive trend over the period.

Summary of key stabilizing events:

- Unveiling of Préval's cabinet (7 June 2006)
- Launch of the DDR program (5 September 2006)
- Improvement in the Haitian-Dominican relationship (12 June 2006)
- Reintegration of Haiti into the OAS and CARICOM (5 July 2006)
- Lifting of the US arms embargo against Haiti (6 October 2006)

Summary of key destabilizing events:

- Clashes between gangs and UN peacekeepers (7 and 13 June, 11 November 2006)
- Clashes between gangs and the Haitian police (20 July and 7 December 2006)
- Protests (both peaceful and violent) for the withdrawal of the UN (19 and 24 October, 18 November)
- Arrest of Lavalas party organizers (28 August 2006)
- Protest for the return of Aristide and threat to use violence by Lavalas members (15 July 2006)

cifp

TABLE 14

All events	57	0.39	7%
Stabilizing	30	5.06	57%
Destabilizing	26	-5.00	56%

TABLE 16

5.3 RULE OF LAW

While the average score of events placed in the rule of law cluster is slightly positive (0.39), the trend is moderately negative overall (-0.20). In other words, the situation on the streets of Haiti has deteriorated during the 6-month period over which events were recorded.

A series of kidnappings targeting foreigners—and more recently school children—has contributed to this downward trend. On the positive side, a slight improvement in the treatment of political prisoners, plans to reform the national police force, and the dismantlement of gangs by the MINUSTAH and the Haitian police have helped to somewhat mitigate the otherwise negative outcome of the cluster.

Summary of key stabilizing events:

- Political prisoners freed (14 June, 28 June, and 14 August 2006)
- Dismantlement of urban gang and crackdown on crime (18 August and 6 September 2006)
- Plans for judicial and police reforms (21 August 2006)

Summary of key destabilizing events:

- Series of kidnappings targeting foreigners (20 June, 20 July, 21 July, 7 August, 17 October, and 29 November 2006)
- Gang members target police officers (11 June and 15 June 2006)
- Gang violence causes the death of many innocent civilians (7 July, 21 August, and 6 December 2006)
- Violence breaks out during municipal elections (3 December 2006)
- The kidnapping of school children forces the government to end the school year prematurely (13 and 16 December 2006)

TABLE 17

	All Events	Stabilizing Events	Destabilizing Events

TABLE 18

	# of events	Average score	Average score as % of total
All events	42	3.52	39%
Stabilizing	35	5.03	56%
Destabilizing	7	-4.00	44%

TABLE 19

5.4 GOVERNMENT AND MARKET EFFICIENCY

The average event score in the government and market efficiency cluster is moderately positive (3.52), resulting in a stabilizing trend overall (0.31).

The majority of events recorded in this cluster have been announcements of international aid grants by industrialized countries following the Donors' Conferences in August and November, and the granting of debt relief by key international organizations such as the World Bank and the IMF. Only a few destabilizing events were recorded and are concentrated around the lack of government response to floods during the hurricane season and government employee protests over non-payment of wages.

Summary of key stabilizing events:

- Announcement of international aid grants by Canada, the United States, the European Union, Venezuela and the World Bank (throughout the period)
- Debt relief granted to Haiti by the World Bank, the IDB and the IMF (20 September, 20 November, and 5 December, 2006)
- The Haitian government initiates a back-to-school campaign in the worst slum of Port-au-Prince and builds centres for street kids (19 September 2006)

Summary of key destabilizing events:

- The government fails to respond to damage caused by floods and bad weather during hurricane season, leading to deaths and the destruction of important infrastructure. (1 August, 30 November, and 5 December 2006)
- Government employees protest over back wages (14 December 2006)
- \$US25 million dollars are blocked in State vaults because of the inability of the government to propose viable projects on which to spend the money. (24 November 2006)

5.5 SECONDARY DRIVERS

Human Rights

Very few human rights-related events were recorded in the period monitored. One was Senator Joseph Lambert's request to reinstate the death penalty to address the lawlessness in the country (18 December 2006). Another is the activities organized and declarations pronounced on 10 December, the tenth anniversary of the Universal Declaration on Human Rights.

Government Transparency and Accountability

Government transparency and accountability continue to be significant challenges for Haiti. During the period monitored, Haiti was ranked 154th in the 2006 Transparency International Corruption Perception Index. There were also irregularities reported during the municipal elections on 3 December 2006 and an issue involving government money being allocated for the purchase of vehicles for elected deputies (6 October 2006). On the positive side, the government attempted to address corruption problems by initiating an inquiry to investigate problems of corruption and misappropriation of funds under the interim government 23 August 2006).

Democratic Participation

Events recorded within the democratic participation cluster have largely been stabilizing. These events come in the form of peaceful protests, the launching of the Haiti's Press Club (21 September 2006) and the holding of the first country's first municipal elections (3 December 2006). This cluster could have a strong influence on the overall improvement of the country if it were to become a primary driver. If properly nurtured, the increasing strength of civil society and the non-intervention of the police during peaceful protests could reinforce democracy and act as a check on government.
