### Book Description

 Publication Date: **January 13, 2012** | ISBN-10: **0415690552** | ISBN-13: **978-0415690553**

The United States is currently the linchpin of global trade, technology, and finance, and a military colossus, extending across the world with a network of bases and alliances. This book anticipates the possible issues raised by a transition between American dominance and the rise of alternative powers.

While a 'post-American' world need not be any different than that of today, the risk associated with such a change provides ample reason for attentive study. Divided into four parts, 50 international relations scholars explore and discuss:

- Power Transitions: addressing issues including the rise of China; the passing of American primacy and the endurance of American leadership
