Note. Students may take 4000-level courses in third year if they have the prerequisites. Students will also need to check prerequisites for higher level courses in other disciplines and plan accordingly.

¹ A first year seminar is highly recommended for all students. FYSMs 1607 and 1400 are usually taught by professors in Cognitive Science.

² Please note that COMP 1805 has two high school math courses (or equivalent) as prerequisites.

³ Students whose CGPA in PSYC courses is lower than the Psychology requirement (i.e., 9.0) must take an additional 1.0 credits in Psychology at 3rd year instead of PSYC 3700.

⁴ Students must have a Major CGPA of 8.0 to register in CGSC 3908 and 4908.
