

COURSE NAME AND CODE

Course	CGSC 3201 B Cognitive Processes
Instructor	John Logan
Term	Winter
Email Address	john.logan@carleton.ca
Office Location	DT 2007
Office Hours	TBA

COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

The topic of CGSC 3201 is human memory. We will focus on the major areas in this area following the metaphor of information flow, from how the basic “machinery” works, to high level topics like “fake news”. Although we will focus mostly on behavioural data, we will also frequently cover data from cognitive neuroscience and modelling. At the completion of the course I expect you would have acquired a useful knowledge of how human memory works. The course will be delivered asynchronously.

EVALUATION

1) 12 weekly cuLearn quizzes (60%), and 2) a 3500-word research proposal paper (40%)
