

CGSC 3201 D COGNITIVE PROCESSES

Course	CGSC 3201 D Cognitive Processes
Instructor	John Logan
Term	Winter 2025
Email Address	john.logan@carleton.ca
Office Location	DT 2215
Office Hours	10:00-11:00 AM Mondays

COURSE DESCRIPTION/INSTRUCTOR'S STATEMENT

The topic of CGSC 3201 is human memory. We will focus on the major areas in this area following the metaphor of information flow, from how the basic "machinery" works, to high level topics like "fake news". Although we will focus mostly on behavioural data, we will also frequently cover data from cognitive neuroscience and modelling. At the completion of the course I expect you would have acquired a useful knowledge of how human memory works. The course will be delivered in person in a combination of lecture and seminar format.

EVALUATION

- 1) 1 20-minute group presentation (20%)
- 2) 4 position papers (4 X 15% = 60%)
- 3) 10/12 weeks class participation (1% per class = 20%)

TEXT

Baddeley, Eysenck, & Anderson (2020). *Memory* (3rd edition), London: Psychology Press. Paperback version: ISBN 9781138326095 (<https://www.routledge.com/Memory-3rd-Edition/Baddeley-Eysenck-Anderson/p/book/9781138326095>)

An e-version of the textbook is also available.
