

Research Stream

Students in the Research Stream have to have a Supervisory Committee. During the 1st three terms of your program, you should be meeting with your Research Project Supervisor(s) and creating a Supervisory Committee which will consist of your Research Project Supervisor or Co-Supervisors and a Second Reader for your Research Project. Your Research Project Supervisory Committee will be there to assist you with your questions as you begin and continue throughout your Research Proposal Agreement, research and subsequent completion. Once you have established your Supervisory Committee, fill out the [Supervisory Committee Form](#) and return to the Graduate Administrator in Room 2202A prior to registering in your Research Project.

M.Cog.Sc. Research Project Stream

The Project Stream differs from the Thesis Stream as students do not have to defend a thesis. Once you have decided on the Project Stream and before you complete an override to register in the Research Project, read [the M.Cog.Sc., Research Project Information and sign the Agreement Form \(Page 2\)](#). You will also have to fill out the Supervisory Committee Form – Research Project (see above). These forms will then be deposited to the Graduate Administrator's Office in Room 2202A. Once the forms have been approved by the Graduate Supervisor, you will be able to register in the Research Project Stream. The completed Research Project is due to your Research Project Supervisor(s) and your Second Reader on the last day of the exam period in the term that you are completing your program requirements in.
