ICS Undergraduate Information – Spring 2017

Program Requirements: The Calendar vs your audit

• Your audit always lists the program requirements for the year you enrolled in your current concentration.

• The undergraduate Calendar lists the *current* program requirements

• You can switch to the current requirements by e-mailing registrar@carleton.ca with your request

What you should know going into 2nd year:

• You should be taking CGSC 2001 and CGSC 2002

• You should make sure to stay up to date with courses in your concentration

• If you have been putting off COMP 1005 you can now take our new course, *CGSC 1005: Computational Methods in Cognitive Science*, since CGCS 4001, which you take in 4th year, presupposes that you have taken one of these courses

What you should know going into 3rd year

• If you are taking Co-op you need to enroll in COOP 1000 (CGPA cutoff is 8.5) in the fall term

• If you are going to do the honours thesis pathway you need to enroll in CGSC 3908 (CGPA cutoff is 8.0)

• You should also be starting to think about possible advisors for CGSC 4908 (Honours Thesis)

• Keep up to date with CGSC courses: in addition to 3908 there is also 3004, 3201, 3301

• If you have been putting off COMP 1005 you should take it or CGSC 1005 now, as CGCS 4001, which you take in 4th year, presupposes that you have taken it

What you should know going into 4th year

• If you are planning on applying to grad school applications and award applications are all due in early fall (we have workshops)

• CGSC 4908 has three sections (A. B, and C) – many students end up enrolling in a second or third section (co-op, delay in finding participants, etc)
