

## **Announcement of the Social Funders Advisory Board**

The Common Approach to Impact Measurement is delighted that these investors and grant makers have joined our Funders Advisory Board. They will get an early look at all the Common Approach deliverables to help make sure that the flexible standard we create can be used for due diligence, grant applications and evaluations. More than a document, a common approach is a community. The Social Funders Advisory Board is being chaired and convened by Tessa Hebb, Distinguished Research Fellow, Carleton Centre for Community Innovation. We are so glad that these organizations have joined our community. To find out more about each enterprise, simply click on their logo!
