Context
Crime is one of the most contentious social issues in the world today. Public debates, political campaigns, media reports, and family discussions circulate around questions of crime rates, the nature of punishment, and the role of police, residents, courts, communities, victims, etc. But what exactly is a crime? Who decides on categories of crime, the enforcement of criminal laws, the rules of a court room, prison policies, or correctional programs targeting those convicted of crimes? How can theoretical perspectives help explain crime and criminal justice? How do social issues become criminalized and how have societies – Canada in particular – approached fundamental questions of innocence, guilt, punishment, and justice? Questions about the intersection of crime and society, such as these, are at the heart of contemporary criminological debates. This class will serve as an introduction to the key topics in criminology; exploring intellectual histories of criminological thought, from its emergence as a particular disciplinary undertaking, to its application across a spectrum of social issues in Canada.

During the course, students will explore key aspects of the emergence of criminology as an academic discipline, numerous theories around crime and criminality, and several key issues related to contemporary criminal justice. We will learn various ways to define and conceptualize “crimes,” the basic structures of Canada’s criminal justice system, theories of punishment, studies of policing and police work, the centrality of crime statistics to our social understanding of criminality, as well as discussing a number of diverse frameworks associated with criminological research. Overall, students in the course should be prepared for a detailed introduction to the field of criminology and a willingness to constructively engage with numerous issues related to Canada’s criminal justice system.

Objectives
The objective of the class is to familiarize students with the basic tenets of the criminal justice system and criminological thought, while demonstrating an ability to apply this knowledge to contemporary issues. By the end of the course, students should be comfortable discussing and writing about an array of issues/concepts related to crime and criminal justice. Students should demonstrate:

> A general understanding of organizations and mechanisms of the criminal justice system in Canada;
> Knowledge of the historical evolution of criminological thought;
> A general comfort with the various theories, frameworks, schools, paradigms, etc., for understanding crime and society;
> An understanding of criminalization processes;
> A general knowledge of themes related to the penal regime;
> Comfort in discussing a number of contemporary criminological issues; and
> An ability to critically analyze issues of crime and society from an academically-informed position.
Required Course Materials
