

Course Outline

COURSE: CRCJ 2200D Contemporary Issues in Criminology

TERM: winter 2025

PREREQUISITES: CRCJ 1000 and second year standing

CLASS: **Day & Time:** Friday 8:35am-11:25am
Room: Please check Carleton Central for current room location.

INSTRUCTOR: Alexander McClelland, Associate Professor, PhD.

CONTACT: **Office:** 1714 DT
Office Hrs: Friday 1:00pm-3:00pm

***Email:** Alexander.mcclelland@carleton.ca

*You must use your Carleton email address in all correspondence with the instructor.

Link to Brightspace page: <https://brightspace.carleton.ca/d2l/home/283512>

ACKNOWLEDGEMENT & AFFIRMATION

Ni manàdjiyànàni Màmìwinini Anishinàbeg, ogog kà nàgadawàbandadjig iyo àkì eko weshkad. Ako nongom ega wìkàd kì mìgiwewàdj.

Ni manàdjiyànàni kakina Anishinàbeg ondaje kaye ogog kakina eniyagizidjig enigokamigàg Kanadàng eji ondàpinangig endàwàdjìn Odàwàng.

Ninisidawinawànàni kenawendamòdjig kije kikenindamàwin; weshkinìgidjig kaye kejeyàdizidjig. Nigijeweninmànàni ogog kà nìgànì sòngideyedjig; weshkad, nongom; kaye àyànikàdj.

ENGLISH

We pay respect to the Algonquin people, who are the traditional guardians of this land. We acknowledge their

longstanding relationship with this territory, which remains unceded.

We pay respect to all Indigenous people in this region, from all nations across Canada, who call Ottawa home.

We acknowledge the traditional knowledge keepers, both young and old.

And we honour their courageous leaders: past, present, future.

COURSE DESCRIPTION

This course will address some of the most pressing issues in criminology and criminal justice today. Students will examine debates regarding: increases in police use of force and deaths in custody, drug decriminalization, programs providing alternatives to toxic unregulated drugs, forced involuntary treatment, policing of dark digital drug markets, policing and the use of technology, including facial recognition, phone hacking, machine learning, and algorithms, technological crimes, such as deepfakes, scams, and doxing, crimes related to wealth inequality, including white collar crimes, neo vagrancy laws criminalizing encampments, as well as crimes related to land, including environmental crimes, and forms of resistance from Indigenous communities, including examining Indigenous legal frameworks and conceptions of justice.

The course will be oriented around the concept of *criminalization*, a main organizing principle in contemporary society. Talking about contemporary criminological issues using the frame of criminalization moves discussions about crime in society away from an understanding that crime is inherent or natural in certain people or communities. Rather, the notion of criminalization acknowledges that what comes to be understood as *against the law* is constructed by social, political, cultural, and economic forces.

Throughout the course, students will learn to engage with critical criminological approaches including intersectional, abolitionist and transformative justice frameworks, and will apply these ideas to examining ongoing issues, debates, and movements. Informed by Indigenous, Black, anti-racist, and feminist readings, this course will critically examine criminalization, racial and colonial injustice, policing, and punitive practices. Students will learn about abolitionist praxis, collective care, and community mobilization. This 2nd year undergraduate level course aims to build upon foundational concepts from CRCJ 1000: Introduction to Criminology and will prepare students for courses at the 3rd and 4th year level.

LEARNING OUTCOMES

By the end of this course, successful students will have demonstrated their ability to:

- Identify, compare, and contrast an array of important contemporary criminological issues and appraise different theoretical frameworks and approaches;
- Define and explain the concept of criminalization and its application to contemporary socio-legal issues in Canadian society, debates, and movements;
- Employ close, critical reading of course texts and content, and identify both central and supporting ideas;
- Critically examine racial and colonial injustice, policing, and punitive practices through analyzing real-world problems and apply this knowledge through individual writing exercises and online discussions.

TEXTS

There is no one simple textbook can address the many complex and current issues this course will address, and therefore the required readings of this course will include a range of articles, book chapters, videos, and other online resources. All the required readings are available on for free and are accessible via ARES in Brightspace. For more details on each reading, see the Course Schedule below, or Brightspace for each week of our class.

COURSE INFORMATION

What students Students can expect the instructor and TAs to be supportive, responsive, and engaged

<p>can expect from the teaching team:</p>	<p>in student learning.</p> <p>This is a 'synchronous', in-person course, which means that all required reading material will be posted in advance of each class via Brightspace, and students can flexibly engage with the material in advance of each class.</p> <p>In-person weekly content will feature a lecture on the week's content, including a PowerPoint, which will be provided in Brightspace the day of the class. There will also be a range of topical videos, short presentations, and guests. Each weekly course lecture will also provide time to discuss course assignments and expectations.</p> <p>Students can also expect a weekly email message from their instructor detailing the week's content, logistics, and other relevant details (Check your Carleton email address!).</p> <p>Your instructor and TAs are available for office hours and can be contacted by email if needed. However, the primary modes of engagement should be via the in-person course, or via the "Ask Your Teaching Team Forum", so we can connect and discuss the material and ideas together.</p>
<p>What we expect from students:</p>	<p>As members of the Institute of Criminology and Criminal Justice and of Carleton University, CRCJ 2200 students are expected to engage in respectful consideration and analysis of course topics and engage in active discussion with peers and with the teaching team.</p> <p>Students should allocate enough time each week to complete the assigned readings in advance of each class, view the course content online, to engage with other posted course content, and to complete assignments. Combined, this should take approximately 3 hours per week. Students should also allocate 3 hours per week to engage in the weekly class and come prepared to engage in discussions. Attendance is mandatory.</p> <p>Some weeks may involve more work due to assignments it is suggested that students prepare their schedules in advance of assignments to help support their success.</p>
<p>Ask Your Teaching Team Forum:</p>	<p>Have a general or specific question about the course, content, timelines, grading expectations, assignments, etc.? Students are asked to please post all course and content or logistics related questions in the "Ask Your Teaching Team Forum" on Brightspace course page. A response to your question will be provided within 48-hours, often much more quickly (excluding weekends).</p>
<p>Expectations & sanctions regarding due dates:</p>	<p>Sometimes life throws us a curveball. However, under almost all circumstances, course assignments must still be handed in on time. There are no accommodations for late assignments unless due to an emergency. Without prior negotiation with the teaching team, no late assignments will be accepted, and the assignment will be graded 0 or F.</p>

Reasons such as travel, jobs, or any misreading of the assignment and examination timetable are not acceptable.

Email policy:

University policy dictates that every student is expected to have a Carleton email address and to check it regularly. Professors, instructors, and TAs will not send e-mails to students at any other email address. Students are encouraged to check their Carleton email regularly to ensure they have up-to-date information on the course.

Students are asked to engage with the instructor and course TAs in a formal and respectful fashion when communicating via email.

In advance of sending an email to the teaching team related to general or specific course question course (which is not related to a private or personal matter), students are asked to:

- A.** Check the “Ask Your Teaching Team Forum” in Brightspace to see if the question has already been answered.
- B.** If a question or issue is not addressed in Forum, students are strongly encouraged to post the question so all students in the class can benefit from the response information.
- C.** After checking the Forum, if a student determines that an email to a member of the teaching team (instructor or TA) is still required, the student must include the following information in their email:
 - Course number (CRCJ 2200D) – include this info in the subject heading of the email.
 - Student’s full name and student number.
 - Clearly indicate the objective(s) of the email.

If students do not include all these pieces of information, it will be difficult for the instructor and/or course TAs to assist with the request.

The teaching team reads and responds to email between 9:00am-5:00pm on weekdays. During the week it may take up to 72-hours for the teaching team to respond to your email.

If a student sends the teaching team more than one message about the same issue in one span of 72-hours, the teaching team will likely find this highly annoying (students would probably agree if they were in the instructor or TA’s shoes). Rest assured, the student’s message will be responded to and addressed! Please be patient, and do not send more than one email.

Finally, please note, the course instructor and TAs do not respond to emails over the weekend. This means that last-minute emails sent the weekend before an assignment is due, will likely *not* be answered in the time before the assignment is due. Please plan

	accordingly.
Learning in times of crisis:	This is a wild time! We are amid a series of historic world events. Things may be different and uncertain. Some days we may not be sure which directions things will go, and we need to be flexible, compassionate, and supportive of each other. The teaching team understands that students may have ongoing and complex obligations and life stressors. We hope to work together to create a respectful and valuable learning experience, which can adapt to this changing and uncertain context as needed.
Devices in class:	Devices (laptops, cell phones) are to be used in the class only for class activities or for documenting course content. We all have places to be and people to see and have a desire to remain connected, but the use of devices in class can be a distraction to your peers and to the professor. While the professor will not generally regulate the use of devices during the class, students are asked to regulate the use of devices and encourage a culture of respect and engagement in the course during class time.
AI	AI tools can be used in this course to develop initial ideas and generate drafts. <u>Any use of AI must be cited as any other formal citation would be used. Lack of citing AI use will constitute an academic violation, and it will be reported.</u> Note: also, that AI tools are generally not great at discussing the current and complex issues we'll be discussing in class, and these tools are also dull and boring writers!
Writing policy & format:	<p>Students will be evaluated on their writing abilities. Writing is a key element of academic learning. It is recommended that students take the appropriate measures to avoid mistakes such as spelling, syntax, punctuation, and inappropriate use of terms, such as proofreading, editing, and having a meeting with the writing services office (https://carleton.ca/csas/writing-services/).</p> <p><u>Format for all written assignments should be as follows:</u></p> <ul style="list-style-type: none"> • Double spaced text (be sure there is no 'extra' space between paragraphs) • Font should be Times New Roman/Helvetica/Arial • Font size 12 • Font colour for all text should be black • 1-inch/ 2.54 cm margins • Include page numbers (preferably on the bottom right) starting on the first page of text (the title page should not be numbered) • Include a title page with your name, student number, name of assignment, and title of paper • Start references on a new page, APA referencing style is preferred, but not required. Be sure whatever referencing style you use to be consistent throughout. To learn more about this format see the Library reference page: https://library.carleton.ca/help/apa-citation-style

ASSIGNMENTS & EVALUATION

The assignments in this course are designed to build upon each other and ensure students do a close and critical reading of all the course content and are thus able to realize the learning objectives. The assignments are intended to support student success, to develop critical thinking skills and engagement with pressing criminological issues.

Evaluation	Grade Percentage	Due Date
Weekly Online Quizzes (10 in total, starting week 2)	1% each x 10 = 10%	Weeks 2-11 Launched on Friday morning, and due every Thursday at 11:59pm
3 Critical course content responses	10% each x 3 = 30%	Week 3: January 24 Week 6: February 14 Week 11: March 28
Mid-term exam	25%	Week 7 Friday February 28 11:59pm
Final exam	35%	Exam period

Online Course Content Quizzes 10%

Before each week of course content there will be a short quiz. The quizzes will consist of up-to 10 multiple-choice/true and false questions based on the assigned weekly readings and other course content presented in Brightspace. All the quizzes will be worth 1%. All Quizzes will stay open for 1 week, launched on Friday morning, and will close Thursday evenings at 11:59pm. Further details will be provided in Brightspace.

Critical Reading Responses 30% (3 at 10% each)

You are asked to submit 3 (3-page) reading response papers. The first response paper is due Week 3. The second response paper is due Week 6. The third response is due Week 9. You will conduct a close reading of a text. Rather than merely summarizing the reading you are required to take an analytical approach to the text. This means that responses should reflect upon, engage, and evaluate the ideas, arguments in the readings, and comment on their implications, articulate new insights you have acquired, or questions the reading raises that you would like to discuss. To demonstrate engagement with the reading students are asked to develop 3 interesting or surprising things you learned, 2 critical questions you would like to pose to the author, along with a short description of the argument. This assignment must be based solely on a reading, not other course content such as videos, websites, or lectures. Further details and a grading rubric will be provided.

Exams (25% take-home midterm due February 28, and 35% final due during the exam period)

Each exam will build upon the themes of the weekly quizzes and discussion questions. The exams will be comprised of short essay questions. Further details will be provided.

How to submit assignments: Please submit assignments using Brightspace. Assignments are due by 11:59pm on the due date. All assignments must be completed to receive a passing grade.

Standing in a course is determined by the course instructor subject to the approval of the Faculty Dean. This means that grades submitted by the instructor may be subject to revision. No grades are final until they have been approved by the Dean.

Week 11: Friday, March 28, 2025

Flexible week! Class decides

Week 12: Friday, April 4, 2025

Course Review Week: Exam preparation

PLAGIARISM

The University Academic Integrity Policy defines plagiarism as “*presenting, whether intentionally or not, the ideas, expression of ideas or work of others as one’s own.*” This includes reproducing or paraphrasing portions of someone else’s published or unpublished material, regardless of the source, and presenting these as one’s own without proper citation or reference to the original source. Examples of sources from which the ideas, expressions of ideas or works of others may be drawn from include but are not limited to books, articles, papers, literary compositions and phrases, performance compositions, chemical compounds, artworks, laboratory reports, research results, calculations and the results of calculations, diagrams, constructions, computer reports, computer code/software, material on the internet and/or conversations.

Examples of plagiarism include, but are not limited to:

- any submission prepared in whole or in part, by someone else, including the unauthorized use of generative AI tools (e.g., ChatGPT)
- using ideas or direct, verbatim quotations, paraphrased material, algorithms, formulae, scientific or mathematical concepts, or ideas without appropriate acknowledgment in any academic assignment
- using another’s data or research findings without appropriate acknowledgement
- submitting a computer program developed in whole or in part by someone else, with or without modifications, as one’s own failing to acknowledge sources with proper citations when using another’s work and/or failing to use quotations marks.

INTELLECTUAL PROPERTY

Classroom teaching and learning activities, including lectures, discussions, presentations, etc., by both instructors and students, are copy protected and remain the intellectual property of their respective author(s). All course materials, including PowerPoint presentations, outlines, and other materials, are also protected by copyright and remain the intellectual property of their respective author(s).

Students registered in the course may take notes and make copies of course materials for their own educational use only. Students are not permitted to reproduce or distribute lecture notes and course materials publicly for commercial or non-commercial purposes without express written consent from the copyright holder(s).

STATEMENT ON STUDENT MENTAL HEALTH

As a student you may experience a range of mental health challenges that significantly impact your academic success and overall well-being. If you need help, please speak to someone. There are numerous resources available both on- and off-campus to support you. For more information, please consult <https://wellness.carleton.ca/>

ACADEMIC ACCOMMODATION

Carleton is committed to providing academic accessibility for all individuals. You may need special arrangements to meet your academic obligations during the term. The accommodation request processes, including information about the Academic Consideration Policy for Students in Medical and Other Extenuating Circumstances, are outlined on the Academic Accommodations website (<https://students.carleton.ca/course-outline/>)
