Love & Sex with Robots: virtual conference

The 6th International Congress on Love & Sex with Robots

INTERNATIONAL – New technologies are changing human sexuality and intimate relationships, both in life and in research. The 6th edition of this academic conference brings together international scholars, industry, stakeholders, and those who are curious about love and sex with robots.

When: Wednesday, August 18, 2021 to Friday, August 20, 2021

Time: 9:00am – 5:30pm EST

Location: Online – Hosted in Montreal, Quebec (Canada)

Registration (\$29 CAD): www.lovewithrobots.com

Recent technological advancements in robotics and artificial intelligence (AI) have opened the door to new possibilities for emotional and erotic interactions with machines. In the fields of Human-Computer Interaction and Human-Robot Interaction, the past few years have witnessed a strong upsurge of interest in the more personal aspects of human-machine relationships.

The International Congress on Love & Sex with Robots (LSR) brings together leading international researchers to openly exchange with members of the private sector, arts communities, political institutions, and the general public on the subject of human-machine love, sex, and relationships.

This year's keynote lineup is stellar with Dr. Justin Garcia, Executive Director of the Kinsey Institute, Dr. Lara Karaian, Associate Professor, Institute of Criminology and Criminal Justice, Carleton University, Dr. Markie L.C. Twist, award-winning sexuality educator, sexologist, relationship therapist and Davecat, Robosexual, iDollator and advocate for artificial humans. Along with many esteemed academic speakers, we also have industry leaders such as Matt McMullen from RealBotix, Bjorn from Lux Botics, Alexis Smith from Cybrothol and Mike Wilson from Holodexxx.
