

# Sustainable Energy Seminar Series

## Delivering Renewable Energy: Reflections on working with renewables and passive building from a local business perspective

As the founder of EcoGen Energy, Chris Weissflog is passionate about helping people reduce carbon emissions. For 11 years his company has operated regionally in the renewable energy and high performance building sectors. Chris will relate experiences that government policies have had on the growth and collapse of consumer demand and industry growth, and the resulting implications for consumers and their providers.

**Tuesday, January 29th**

**RM 2017 Dunton Tower**

**Carleton University 5:45 – 7:30PM**

**5:45 - 6:00PM Meet the Speaker**

**6:00 - 6:45PM Presentation**

**6:45 - 7:30PM Q & A**

After 21 years of military service, Chris Weissflog (BSc, MSc, MBA, CPHC (PHIUS), RASDT/RHDT (HRAI)) founded EcoGen Energy in 2007. He is currently focused on providing custom sustainable buildings and energy systems solutions, through designing and building low to zero carbon homes using extremely high performance passive building design, advanced & efficient HVAC system design, progressive use of photovoltaics (grid-tied, grid-interactive and off-grid), solar thermal, building-integrated thermal energy storage, earth energy systems, and a range of measures and techniques to further improve efficiency.
