

Sustainable Energy Seminar Series

Making the Polluters Pay?

Political lessons for successful carbon pricing

Despite being favored by many experts, policies putting a price on pollution face substantial political challenges. This talk reviews those challenges, as well as how successful and long-running efforts to put a price on carbon emissions associated with global warming in the United States offer important lessons for overcoming those obstacles in other political contexts, including Canada.

Thursday, November 1st

RM 2017 Dunton Tower

Carleton University

5:45 - 6:00 PM Meet the Speaker

6:00 - 6:45 PM Presentation

6:45 - 7:30 PM Q & A

Leigh Raymond is Professor of Political Science at Purdue University and the Fulbright Canada Chair in the Sustainable Economy at the University of Ottawa for fall 2018. He received his Ph.D. in Environmental Science, Policy, and Management from U.C. Berkeley, and a B.A. in Philosophy from Yale University. Dr. Raymond's research focuses on "market-based" environmental policies, including emissions trading policies to address climate change.
