

WHAT DOES CANADA'S ENERGY  
FUTURE LOOK LIKE TO YOU?

CSERC Seminar Series

## Re-energizing Canada and Building the Next Generation of Energy Leaders

In April 2017, the Federal Minister of Natural Resources Jim Carr launched a national dialogue to encourage Canadians to share their ideas and participate in building a vision for Canada's energy future. The purpose is to identify the values that should guide us, the goals that we should seek to achieve, and the pathways to get us there. To inform this dialogue, Natural Resources Canada commissioned an independent, scholarly report on the transition to a low carbon economy by 71 academics from Sustainable Canada Dialogues.

**September 19<sup>th</sup>**

Dunton Tower, Room 2017  
Carleton University

5:45 – 6:00 PM Meet the Speaker

6:00 - 6:45 PM Presentation

6:45 - 7:30 PM Q & A

Carleton Professor **James Meadowcroft** was one of the lead authors involved in crafting RE-ENERGIZING CANADA: Pathways to a Low Carbon Future.

**Matt Brady** is a graduate of the Sustainable Energy Policy and Engineering Program and is co-leading the Generation Energy consultations.
