Graduate Diploma in Economic Policy, Department of Economics, Carleton University

The Graduate Diploma (GDip) in Economic Policy is designed to expose anyone with an undergraduate degree and some formal training in undergraduate economics to a wide range of issues related to the formulation of economic policy. New and emerging policy insights, policy frameworks and databases informing economic policy design and evaluation will be covered. The program courses will offer topics such as health, climate change, monetary, fiscal, environmental, trade, innovation and regulation policies. For program information and registration, click here.

Program Instructors (2021-2022)

Raúl Razo-Garcia is an Associate Professor of Economics at Carleton University, Ottawa. He received his Ph.D. Economics from the University of California at Berkeley (as a Fulbright scholar). From 2000 to 2002 he worked at the central bank of México. His main research interests are international finance and open macroeconomics. He has published on various topics in international finance and open macroeconomics, such as the openness of the financial account, exchange rate regimes, international reserves, currency crises, and the inflationary process in Mexico. Raúl is also one of the authors of the textbook Macroeconomics (with Dornbush, Fisher, Startz and Lenjosek) and he has trained a team of B.Econ undergraduate students who have made it to the final national round of the prestigious Bank of Canada Governor's Challenge in the past two years.

Professor Raúl Razo-Garcia  ECON 5060: Economic Analysis of Public Policy

Jeremy is Associate Director, Research at the C.D. Howe Institute, where he is in charge of the financial services and monetary policy research programs. He received his Ph.D. from Brandeis University. Jeremy has published on such topics as the importance of demographics for monetary policy effectiveness, the impact of non-bank financial intermediaries on monetary policy, the importance of debt service ratios for predicting future financial crises, and macroprudential policies. Jeremy has contributed to the public debate through op-ed publications in the Globe and Mail and Financial Post, and has testified in front of both the House of Commons and Senate of Canada. Previously, Jeremy worked in the international tax department at Deloitte & Touche LLP, and in both the financial stability and international departments of the Bank of Canada.

Dr. Jeremy Kronick  ECON 5061: Central Banking: Theory, Practice, and Recent Challenges

Vivian Hoffmann is a Senior Research Fellow at the International Food Policy Research Institute. Her research addresses the economics of food systems and health behavior, with a focus on low- and middle-income countries including Kenya, Ghana, India, and Bangladesh. Vivian has served as an Associate Editor of the American Journal of Agricultural Economics and has published extensively in leading field journals in development and agricultural economics, as well as in top interdisciplinary journals. She co-leads a global initiative of the Consultative Group of International Agricultural Research on the intersections of animal, human, and environmental health.
