Course Description

Until two centuries ago, per capita incomes were not very different among the countries of the world. Furthermore, overall levels of economic activity were fairly stable. Macroeconomics explores the factors that underlie the differences in living standards that have emerged between the richest and poorest countries, and why economic activity fluctuates from year to year. It studies how economies grow, change over time, and interact with one another.

The main objective of this course is to provide a framework to understand how the economy works in the aggregate, grows in the long run, and fluctuates in the short run. In pursuing this goal, the course will explore interesting and important issues in macroeconomics including:

- How do we measure an economy's performance?
- What drives long run economic growth and improvements in living standards?
- What causes fluctuations in the levels of economic activity in the short run?
- How do government fiscal policies influence the level of economic activity?

Online Lectures

Throughout the term, recorded (asynchronous) lectures will be released each Tuesday at 6:05pm through links accessible on Brightspace, and viewable anytime during the term following its release, with the exception of the first lecture which will be recorded live. Student attendance for the first lecture is recommended, but not compulsory.

Evaluation

The course grade will be based on the 6 online assignments and 2 examinations.

Course Grade	
	Weight
1 Preparatory Assignment	2%
5 Assignments	25% (5% each)
1 Midterm Exam	33%
1 Final Exam	<u>40%</u>
Total	100%

Assignments

Course assignments will provide formative assessments for class members, providing feedback and guidance on their level of understanding, in addition to assessing each student's performance on the material within each chapter. Each Assignment (except the Preparatory Assignment, worth 2%) has a weight of 5% of the overall course grade.

Course assignments are to be completed online via links to Mindtap provided through Brightspace.

Assignment	Course Weight	Chapter	Due Date
Preparatory Assignment	2%	2 (Appendix)	Jan 22
Assignment 1	5%	5, 6, 9	Feb 5
Assignment 2	5%	7, 8, 10	Feb 12
Assignment 3	5%	11, 12, 13	Mar 19
Assignment 4	5%	14, 15, 16	Apr 2
Assignment 5	5%	17, 18	Apr 9

Many assignments questions allow multiple attempts to enhance understanding where weaknesses are identified. If a mistake is made on the first attempt, alternate versions of the question can be attempted up to two more times. The average grade on all attempts will count as the final score for the question.

Late Penalty: Class members take responsibility for keeping up with assignments from week-to-week in line with the above schedule. Assignments may be submitted up to 3 days past the due date subject to a flat percentage deduction of 10%, applicable to the component of the assignment submitted late. Further extensions of assignment deadlines will not be granted since the solutions become available to class members 3 days after the due date. Extensions for documented reasons will apply only to the last part of multi-part assignments, e.g., Part 4 of 4.

Bonus marks for the incentive program will be added to course grades only upon the conclusion of classes for the term.

The *Incentive Program* is not offered to class members scoring above 70% on the course midterm, but instead focuses on improving the study skills of students below the B- level in the course.
