Introduction

An introduction to graduate-level microeconomic theory, including topics such as utility maximization and individual choice, decision-making under uncertainty, producer theory (technology, costs, and profit maximization), alternative market structures (competition, monopoly, and oligopoly), general equilibrium, and the economics of information.

Precludes additional credit for ECON 5000 (no longer offered) and ECON 5001 (no longer offered).

Evaluation

There are three grade requirements for this course:
Midterm: 35%, scheduled for February 26th
In-class exercise: 5%, scheduled for March 26th
Final exam: 60%, scheduled by the University.

I will also give out assignments on a regular basis. Even though these will not be graded, I strongly recommend spending a lot of time on the assignments, as they prepare you for the exams. Try thinking about problems without looking at your notes or the book first. When you get stuck, consult your notes; when you get really stuck, ask your fellow students for help or come to office hours.

The in-class exercise consists of a “game” in which you make decisions for a hypothetical firm. Your grade in this category will depend on your firm’s performance compared to a previously defined benchmark.
Students who can *document* a compelling reason for missing an assignment will be excused and their final grade will be based on their performance in the rest of the course; i.e., the weight of each of the remaining evaluation instruments will rise by a factor of \( Y \), where \( Y = \frac{100}{100 - X} \), with \( X \) being the weight of the missed evaluations. Students must inform the instructor of such an absence in advance, if possible.
