Message from the Dean

At Carleton's Faculty of Engineering and Design, we believe in hands-on education with real-world application. Our goal is to ensure our students receive a comprehensive education that prepares them for a successful and satisfying career.

Learning by doing is a rewarding enhancement to your academic studies in classrooms and laboratories. That is why every program within the research-intensive Faculty of Engineering and Design offers co-operative education. By choosing co-op, you will gain valuable experience in your field of study, develop professional contacts and earn money to help pay for your studies. Applying your knowledge

in a real-world setting also helps you build your CV before you graduate.

Carleton's co-operative education program offers outstanding local, national and international opportunities for rewarding, real-world experience in well-known organizations and government agencies. Sharing a city with some of the world's best tech companies and government laboratories offers excellent opportunities for co-op and internship placements, as well as a high number of prospects for future employment. This guide has been produced to help our students identify potential co-op employers and career options, but also to give prospective students a glimpse of the employer opportunities available to those choosing to study at Carleton.

Our programs continue to expand and adapt to the changing needs of society to ensure that our graduates have the knowledge and skills that are highly desirable in today's fast-paced, technology-driven world. This list of employers is by no means exhaustive, but rather serves as a snapshot of the many organizations interested in Carleton's co-op students and graduates. You'll find Carleton alumni at some of the hottest companies around the world such as Facebook, Twitter, Amazon, IBM, and many more in addition to those listed herein. I invite you to explore this guide and discover the many opportunities available to our students and graduates.

Fred F. Afagh, PhD, P.Eng, SMAIAA
Interim Dean, Faculty of Engineering and Design

Message from Co-operative Education

Co-operative Education is the perfect opportunity to get a head start on your career. Co-op work terms allow for the development of key employability skills and the exploration of career options, empowering students to graduate with tangible workplace experience and a competitive edge when entering the job market.

Co-op work terms are degree-related, paid opportunities available exclusively to co-op students. Study terms are integrated with work terms of 4, 8, 12 and 16 months, depending on the program. Students typically require an additional year of study to complete the co-op work terms and fulfill the academic requirements of their specific program.

Carleton's close proximity to an active high-tech community, several renowned research facilities, and many government departments and agencies offers diverse options for work terms within the national capital. In addition to local opportunities, Carleton co-op students have completed work terms across Canada and around the world!

Students in engineering programs who plan on completing their professional designation (P.Eng) upon graduation may be eligible to count up to 12 months of work experience towards the 48 months necessary to obtain their license.

Co-operative Education Benefits

- Provides practical on-the-job experience
- Allows for networking with a variety of industry professionals
- Helps you earn money during your studies
- Develops professional skills
- Adds significant value to your degree

For more details and to learn more about co-op eligibility visit carleton.ca/co-op.

Career Services

Career Services provides free career planning and advice, and helps connect you with potential employers through networking events, job postings and career fairs. From the first year of your studies, you can access services and programs that will help you make a successful transition from school to work. For details, visit carleton.ca/career.

Amdocs

bbb architects

bbbarchitecture.com

bbb architects
ottawa inc.

bbb architects ottawa inc. (bbb ottawa) is a diversified architectural practice, offering a full range of architectural services, with a reputation for delivering projects that exceed their clients' expectation in all categories: budget, schedule and design.

TYPICALLY RECRUITS FROM

- Architectural Studies

Since 1985, bbb ottawa has been privileged to work for some of the most prestigious public and private sector clients in Canada and abroad. The firm is known for the diversity of its portfolio, having designed buildings of virtually every typology. The diversity is largely the result of the firm's reputation for exhaustive research into every aspect of their clients' needs. bbb ottawa believes that a new client's project should not be a derivative of past projects. Each new client and project should be researched, with respect to the client's specific culture, structure and current precedents in the industry.

This approach has proven to engage our clients, allowing them to participate and enjoy the creation of their project, while keeping our firm motivated to find fresh and innovative solutions.

BGIS is a leading provider of real estate management services, including facilities management, project delivery services, energy and sustainability solutions, building performance management, workplace advisory and management, and real estate services. With a combined team of over 7,000 team members globally, BGIS inspires better business performance across its client's real estate portfolios by developing and implementing real estate and facilities management strategies. Globally, BGIS manages over 300 million square feet of client portfolios across 30,000+ locations in North America, Europe, Middle East, Australia and Asia.

BionX is on a mission to revolutionize the way people move. Our award-winning electric drive systems are answering a growing worldwide demand for alternative transportation solutions that enable environmental sustainability and a higher quality of life. Although BionX e-bike systems were first introduced to the market over 10 years ago as purely a retrofit product on any bicycle, the systems eventually evolved and became available as standard equipment on complete electric bicycles in 2008. The brand quickly became synonymous with technological innovation and product quality.

Today, many leading bicycle manufacturers in Europe and North America, including Trek, Matra and Wheeler to name a few, offer complete products powered by BionX. Headquartered in Aurora, Ontario, BionX International has various locations and sales partners in over 15 countries. Our Aurora facility serves as the centre of global operations for sales, service, marketing, testing, sourcing and resident engineering. It is also home to the main BionX production and assembly plant, where our e-bike systems consisting of a battery, motor and console are produced and shipped to customers across various continents.

Connecting the world – people, machines, and devices – securely and reliably is in our DNA. You can help us push the boundaries of innovation and enable people and businesses to not just do more, but be more. BlackBerry provides both new graduate and undergraduate opportunities with internships and co-op placements offered every January, May, and September. We have over 200 roles available every term in disciplines such as: Software, Hardware, IT, Accounting, HR, and Communications.

CAE is Canada's largest full service defence and security company with 8,500 employees worldwide – 4,500 of which call Canada home. Headquartered in Montreal, CAE is the world's leading pilot training organization, training over 120,000 crewmembers annually and thousands of healthcare professionals worldwide. Specifically for the defence and security market in Canada, CAE addresses the pilot training requirements of the Royal Canadian Air Force (RCAF) with CAE's full-service capabilities and continues to be its training systems integration partner of choice. As Canada transitions to its next-generation defence programs, we recognize the opportunities to expand CAE's footprint and capabilities to better support the Canadian Armed Forces and public safety security programs with both comprehensive training and in-service support solutions. CAE also has an innovating healthcare division called CAE Healthcare, which offers cutting-edge learning tools to healthcare students and professionals, allowing them to develop practical experience through risk-free simulation training before treating real patients. CAE Healthcare's full spectrum of simulation solutions includes surgical and imaging simulation, curriculum, the LearningSpace audiovisual and center management platform and highly realistic adult, pediatric and baby patient simulators. Today, approximately 12,500 CAE Healthcare simulators and audiovisual solutions are in use worldwide by medical schools, nursing schools, hospitals, defence forces and other entities.

CENX

cenx.com

CENX fundamentally changes the way service providers view their networks. What does this mean? Today's networks are complex systems with an overwhelming amount of data passing through it. Managing this much data is challenging, but somehow, service providers need to harness it, understand it, and act on it to provide the best possible service to customers like you. Our software ingests all their network data, processes it, and visualizes it in a way that makes it easily viewable, searchable, and manageable. With an R&D team located in Ottawa and offices in the United States and the United Kingdom, CENX is able to serve the needs of service providers around the globe. At CENX, our software is unique, next-generation, and groundbreaking!

Kinaxis is a leading provider of cloud-based subscription software that enables our customers to improve and accelerate analysis and decision-making across their supply chain operations. The supply chain planning and analytics capabilities of our product, RapidResponse®, create the foundation for managing multiple, interconnected supply chain management processes. By using the single RapidResponse product instead of combining individual disparate software solutions, our customers gain visibility across their supply chains, can respond quickly to changing conditions, and ultimately realize significant operating efficiencies. With the stability of an established company and the heart of a start-up, Kinaxis is a great place to work! If you're searching for a challenging and rewarding career, we just might have what you're looking for!

HELPING THE FUTURE ARRIVE...

As a premier systems integrator, **Lockheed Martin Canada** Rotary and Mission Systems (RMS) brings together the best systems from around the world to create an integrated solution where the value of the whole is greater than the sum of its parts.

DELIVERING INNOVATIVE TECHNOLOGIES

For more than 75 years, Lockheed Martin Canada RMS has built a portfolio of programs ranging from global security to sustainable energy to defence. Our business enterprise consists of a broad spectrum of disciplines including the fields of engineering, computer science, software development, information systems, and business management.

SOLVING COMPLEX PROBLEMS – AROUND THE WORLD

Lockheed Martin Canada RMS is a leader in naval Combat Systems Integration with a proven track record of delivering systems, such as our exclusively Canadian-made Command Management System for both the modernized HALIFAX class fleet as well as the new-build Arctic Offshore Patrol Ships in Canada.

Our team's success is attributed to the amazing talent of our employees who are the inventors of our advanced technologies, as well as our open business model where we work in close collaboration with our customers and industry partners. This combination has led to multiple successes around the world where we enjoy the pleasure of working with customers in New Zealand, Chile, United Kingdom, the United States, and have promising opportunities for expanding our horizons in Europe and South America as well as back home here in Canada on the exciting Canadian Surface Combatant Project.

MEETING CHALLENGING MISSIONS

Lockheed Martin Canada RMS has developed a formula for success and are committed to remain one of the leading companies in Canada providing systems solutions and services for our customers worldwide.

To build on this success, we are looking for Canadian talent across all disciplines and levels to join our team who share our vision, embody our values, and who have a passion to perform with excellence.

...WE'RE ENGINEERING A BETTER TOMORROW

Lumentum

lumentum.com

Lumentum, headquartered in Milpitas, California is a market-leading manufacturer of innovative optical and photonic products. Lumentum was spun out (in August 2015) of JDSU, a longtime and large Canadian employer. The Ottawa location is one of Lumentum's largest outside of the United States. In addition to corporate offices, there are extensive on-site laboratories focused on micro-optics assembly, alignment, optical and mechanical characterization, packaging and testing. Lumentum has an extensive history with community outreach in Ottawa: fundraisers for the United Way, the Sens Foundation, and the Ottawa Run for Reach, amongst others.

Finding data and information on a smartphone or computer can lead to an arrest or an exoneration. Helping investigative teams navigate that data and find the truth fuels everything we do. It makes us push boundaries and look for new, modern ways to solve investigative problems. Magnet Forensics has been helping examiners and investigators fight crime, protect assets and guard national security since 2009. Magnet Forensics is a trusted partner for thousands of the world's top law enforcement, government, military and corporate organizations in over 93 countries.

Join a company that's helping shape the future of global security.

Video. It starts with the surveillance cameras you see every day and is one of the most sought-after sources of business intelligence. Whether used to improve security, or as the core of a full-fledged data analytics solution, video is also the foundation of our technology expertise. It's what March Networks is known for worldwide and what we do better than the competition.

At March Networks, we take pride in pushing video's traditional boundaries and encouraging innovation. That's how we're able to make a positive impact on the people and companies that benefit from our intelligent video solutions.

Everyone has a role to play in global security. We are looking for people with creativity, inspiration and a desire to make a difference.
