

FARM TYPE DATA ALLOCATION METHODOLOGY
Workbook Title: Farm type Data 2011 v May 6 2015

Overview

This document outlines methodology used to develop farm type data for Eastern Ontario Region. These regions include: Stormont, Dundas and Glengarry, Prescott and Russell, and Ottawa Region. Census data is from 2011. Data and methodology developed in this spreadsheet informed the methodology used in the “Huffman Census Trends from 1991-2011”, which are described in detail in the **Farm Type Allocation Documentation**.

Workbook Author:

Dan MacDonald

How To Use This Workbook:

See the **License** sheet for permissions for data use

See **2011** for raw data specific to Stormont, Dundas and Glengarry region, Prescott and Russell Region and Ottawa Region.

See **Notes** sheet for Symbol conventions and links to more information about Statistics Canada information.

SD&G summarize agriculture census information for the Stormont, Dundas and Glengarry region. See comments in cells for specific assumptions and calculation notes.

Comment List lists all comments pertaining to the S,D & G sheet.

F_S,D&G sheet lists all formulas used in the S,D & G sheet
