Course description:

The purpose of the course is to introduce you to the concepts found in the social sciences (Anthropology, Sociology, Communications, Geography and Psychology). We will explore human behaviour and culture from both an individual and group perspective including our everyday social interaction with others around us. Have you ever wondered why we act the way we do? Why do we all face the door in an elevator? Why do we shake hand when we meet someone? You will be asked to become an observer in your world to understand social behaviours. This will help you understand your own behaviours and actions as a member of society. The course will also explore cultures around the world and their ever changing social conditions. Are we all different or do we share more in common than we think? Prepare to take a journey of exploration and discovery into the strange world of human interaction.

The goal of this course is to appreciate the diverseness of the social sciences and the human condition. It will help you develop the ability to think critically about your own experiences and culture. The course will challenge your way of thinking about yourself and others and enable you to reflect on human behaviours and culture.

Required Text: Course readings will be discussed the first day of class. Material will be available on CULearn. You are responsible for completing your readings each week. The lectures will cover material from the required text and also from each week's readings. You will have an opportunity to discuss each week's readings in class.

Participation: Your regular attendance and active participation are of central importance to this course. I hope to provide you with both a fun and satisfying educational experience.
