STOP the destruction of our public health care!

PROTEST ON PARLIAMENT HILL

Alberta's government has passed a new law launching a full-frontal attack on the fundamental principles of public health care in Canada. They are attempting to create a "market" for private health insurance corporations, which threatens the whole country in very short order if we don't stop it. If U.S. private insurance companies are able to flood into Canada, it will be almost impossible to stop them.

We demand that the federal government uphold and enforce the Canada Health Act now – before it is too late.
