

2016 Discovery Lecture

THE NEW COMMUNICATION CLIMATE

Andrew Revkin

Social media and the web offer unprecedented connectivity but, without conscious effort, can insulate us from everyone but “friends” and from ideas that might challenge strongly-held beliefs. Pace University communications professor and blogger Andrew Revkin will describe extraordinary innovations, showing how bottom-up and peer-to-peer communication can fill gaps as the old information gatekeepers—from sage broadcasters to newspaper front pages (to university professors)—lose influence.

Thursday, February 25
7:00 pm
River Building-2nd level
Atrium and Conference rooms

Seating is limited. Please register by February 20th at events.carleton.ca/the-new-communication-climate-2016-discovery-lecture/
