

The Department of Geography and Environmental Studies Founders Seminar Series Presents:

Navigating the role of fire in Canada's peatlands: Space and time considerations

Torching flank fire in a thinned boreal black spruce bog during the 2019 Pelican Mountain experimental fire

Dr. Dan Thompson

Forest Fire Research Scientist,
Natural Resources Canada

**Wednesday
February 1st**

Time: 2:30 - 4:00 pm

Location: Virtual

Dr. Dan Thompson has worked as a wildfire research scientist with the Canadian Forest Service since 2011. He graduated with a Ph.D. in forest hydrology from McMaster University in 2012. His research is focused primarily on boreal wildfire, with a special emphasis on peatlands, and its impacts using an environmental physics framework. His research and wildfire incident roles as a Fire Behaviour Analyst has taken him from British Columbia to the western subarctic to eastern Quebec and many points in between.

Register in advance for this meeting:
