**COURSE DESCRIPTION**

There is an overwhelming consensus among climate scientists and others that climate change poses a serious – and potentially grave – threat to human beings, ecosystems and other species. This course will use a social science perspective to look at the issue of global climate change, including its history, root causes and consequences. Throughout the course, we will discuss how the climate crisis is integrally related to global capitalism, systems of power and inequality, and the structure of the modern corporation. We will consider the specific role of social processes and institutions – such as politics and governments, economic growth, globalization, the fossil fuel industry, consumer culture, the mass media, and the advertising and public relations industries – in shaping climate change debates and contributing to the crisis. We will also examine the efficacy of different responses and solutions to the problems associated with climate change, ranging from market reforms and ‘green capitalism’ to more radical social and economic transformations.

**COURSE OBJECTIVES**

Because this is a social science course, students will be encouraged to think critically about how social, economic and political arrangements underlie global climate change. How and why are dominant social institutions at the root of climate change and our current responses to it? What are the connections between social and economic inequality and the policy-making process? How do systems of power, culture and ideology impact and accelerate the climate change threat? More generally, this course will challenge students to identify and interrogate their beliefs and assumptions about the social world, and to identify opportunities for engagement with these issues beyond the boundaries of the classroom.

COURSE REQUIREMENTS AND EVALUATION

1. **Midterm Exam, May 28th**

While the paper can draw on some of the weekly readings, it must also reference additional academic sources. It should be approximately 12-15 double-spaced pages. Papers will be graded on the quality of your research and writing, strength of your analysis and arguments, and your ability to situate your arguments within existing debates. Students are encouraged to discuss paper ideas with me at any point during the term. Late papers will be penalized 5 percent per day. Additional information will be provided in class.

3. **Final Exam**
