

Honours Field Course  
GEOG 3000 / ENST 3900  
Early Summer Term 2026

# Investigating Ottawa's urban green spaces

*DEREK SMITH, Associate Professor  
Geography and Environmental Studies  
dereka.smith@carleton.ca  
B449 LOEB BUILDING*

## Interested in doing some fieldwork this summer?

This course will provide you with hands-on field research experience at sites within walking distance of campus to examine social and environmental change in urban green spaces. You will learn how to design and carry out a survey, conduct interviews, assess human modification of the landscape, measure plastic pollution, and more. You will gain both practical skills and a better understanding of how field research generates critical knowledge about our changing world.

## Course format:

This early summer course includes classroom meetings and field outings.

## HIGHLIGHTS

Environmental fieldwork

Hands-on learning  
Urban green space management

Low student to instructor ratio
