

INTERDISCIPLINARY HEALTH RESEARCH PROJECT PREFERENCES

Please review the upcoming prospective HSTP Interdisciplinary Health Research Project descriptions (available on our website - <https://carleton.ca/healthsciences/health-sciences/graduate/msc-in-health-sciences/admissions-msc-in-health-sciences/msc-in-hstp-proposed-research-projects/>). All applications for the MSc in Health: Science, Technology and Policy must include a ranking of the proposed research projects. Please rank your top 3 preferred Interdisciplinary Health Research Projects; with 1 being your most preferred, 2 being your next most preferred, and so on. For each choice you must include a brief statement (max 250 words each) to explain the qualifications and experience that you have achieved and you feel will contribute toward the project (e.g. courses taken, especially graduate-level statistics where relevant; evidence of background expertise through undergraduate specialisation and/or work-related experience).

Ranking	Project Title (and primary supervisor's name)	Qualifications
1		
2		
3
