Mark Gorgolewski is Chair, Department of Architectural Science, Ryerson University, and the author of *Resource Salvation: The Architecture of Reuse* (2018). Mark is past director of the Canada Green Building Council (CaGBC) and former Chair of the Association for Environment Conscious Building in the UK. Mark's research areas include building performance assessment, sustainable housing, reuse of components and materials, and design for urban agriculture. His interest is in the area of closed-loop systems applied to the built environment. This includes strategies to enhance the performance sustainability of construction materials, building products, buildings as well as urban environments. His work addresses the integration of energy, water, materials and urban food systems.
