ICSLAC SEMINAR ROOM, ST. PATRICKS 201D

Is waste a mere *product* of time or is it a *producer* of time? How does nuclear waste's inhuman temporality reframe ecological time? How are discarded things dispersed in a spatial and temporal sense? Come and discuss these and other questions from a range of disciplinary perspectives. Open to all. Contact kyveli.mavrokordopoulou@ehess.fr for readings and visit carleton.ca/climatecommons for more info.
