### Job Description

In partnership with Carleton University and the School of Industrial Design, Nureva is looking for a highly motivated undergraduate or graduate student to work on a joint research project as a **User Experience research intern** for the summer term.

As a UX intern, you will work alongside an academic supervisor and a diverse team of developers, engineers, designers, and product managers from Nureva who are passionate about technology, user experience and market success. You will help drive the development of new product innovations by researching, investigating, and testing UX strategy and design.

The entrepreneurial environment at Nureva appeals to self-driven, flexible team players who learn quickly and are not afraid to seek out creative solutions to tackle hard problems. If this describes you, then please consider this unique collaborative internship opportunity.

This internship provides an opportunity to refine your UX skills in:

- User observations
- Useability reviews/ Heuristics analysis
- Planning and conducting user interviews (In person and remotely)
- Planning and conducting stakeholder working sessions

- Competitive analysis
- Persona development
- Story mapping
- Researching new technologies and bringing forward new ideas

### About Nureva

Nureva is an award-winning technology company that develops solutions to the problems that stand in the way of effective group collaboration. We are driven by the belief that a diverse group of individuals working creatively together toward a common goal can accomplish truly incredible things. We support collaborative approaches to idea generation and problem-solving. Our simple and thoughtful hardware, software and services make collaboration easy, so imagination can flourish.

We design and develop innovative audio-conferencing systems and supportive software that make hybrid work and learning easy and successful from anywhere.

### Job Requirements

- Must be enrolled in a University degree program at Carleton University.
  - Preferably in Industrial Design, Human-Computer Interaction, or other related disciplines.
  - Must be in third-year undergraduate standing or above.
  - Masters and PhD candidates are welcomed and encouraged.
- A problem-solving aptitude and experience in design research.
- Strong written and verbal communication skills.
- Ability to self-organize and work independently.

### Contact

If you are interested in this summer internship, please send a resume, cover letter, and a portfolio of sample work to Tim Haats ([tim.haats@carleton.ca](mailto:tim.haats@carleton.ca)) and Mark Fletcher ([markfletcher@nureva.com](mailto:markfletcher@nureva.com)).
